

PET LOOP

A Mobile Platform for Pet Training

Pet Loop App is a versatile tool that can benefit dog trainers and dog owners. It enables professionals and pet owners to keep historical records of each pet, making it easy to track progress, manage care, and maintain clear communication with all parties involved. Pet Loop App provides a centralized hub for all pet-related trainings and efficient process.

About Project

A Mobile Platform for Pet Training

The Pet Loop App aims to solve this problem by providing an all-in-one solution that allows pet trainers and pet owners to easily share, manage, and store communication related to pet training such as documents, photos, videos, and texts, Leading to better pet training outcomes.

Problems

Pet trainers and pet owners often struggle to share and manage communication related to pet training.

There is a need for an all-in-one solution that allows pet trainers and pet owners to easily share, manage, and store communication related to pet training.

This fragmented approach makes it difficult to keep track of all communication related to pet training and can lead to miscommunication and confusion.

Solutions

The app allows pet trainers and pet owners to easily upload and share documents related to pet training. This includes training schedules, veterinary records, and other important information.

The app provides secure storage for documents, photos, videos, and texts related to pet training. This ensures that all information is kept confidential and only accessible to authorized users.

The app provides a centralized platform for communication between pet trainers and pet owners. This ensures that all communication related to pet training is stored in one place, making it easy to access and track.

Design Interpretation

UI Design

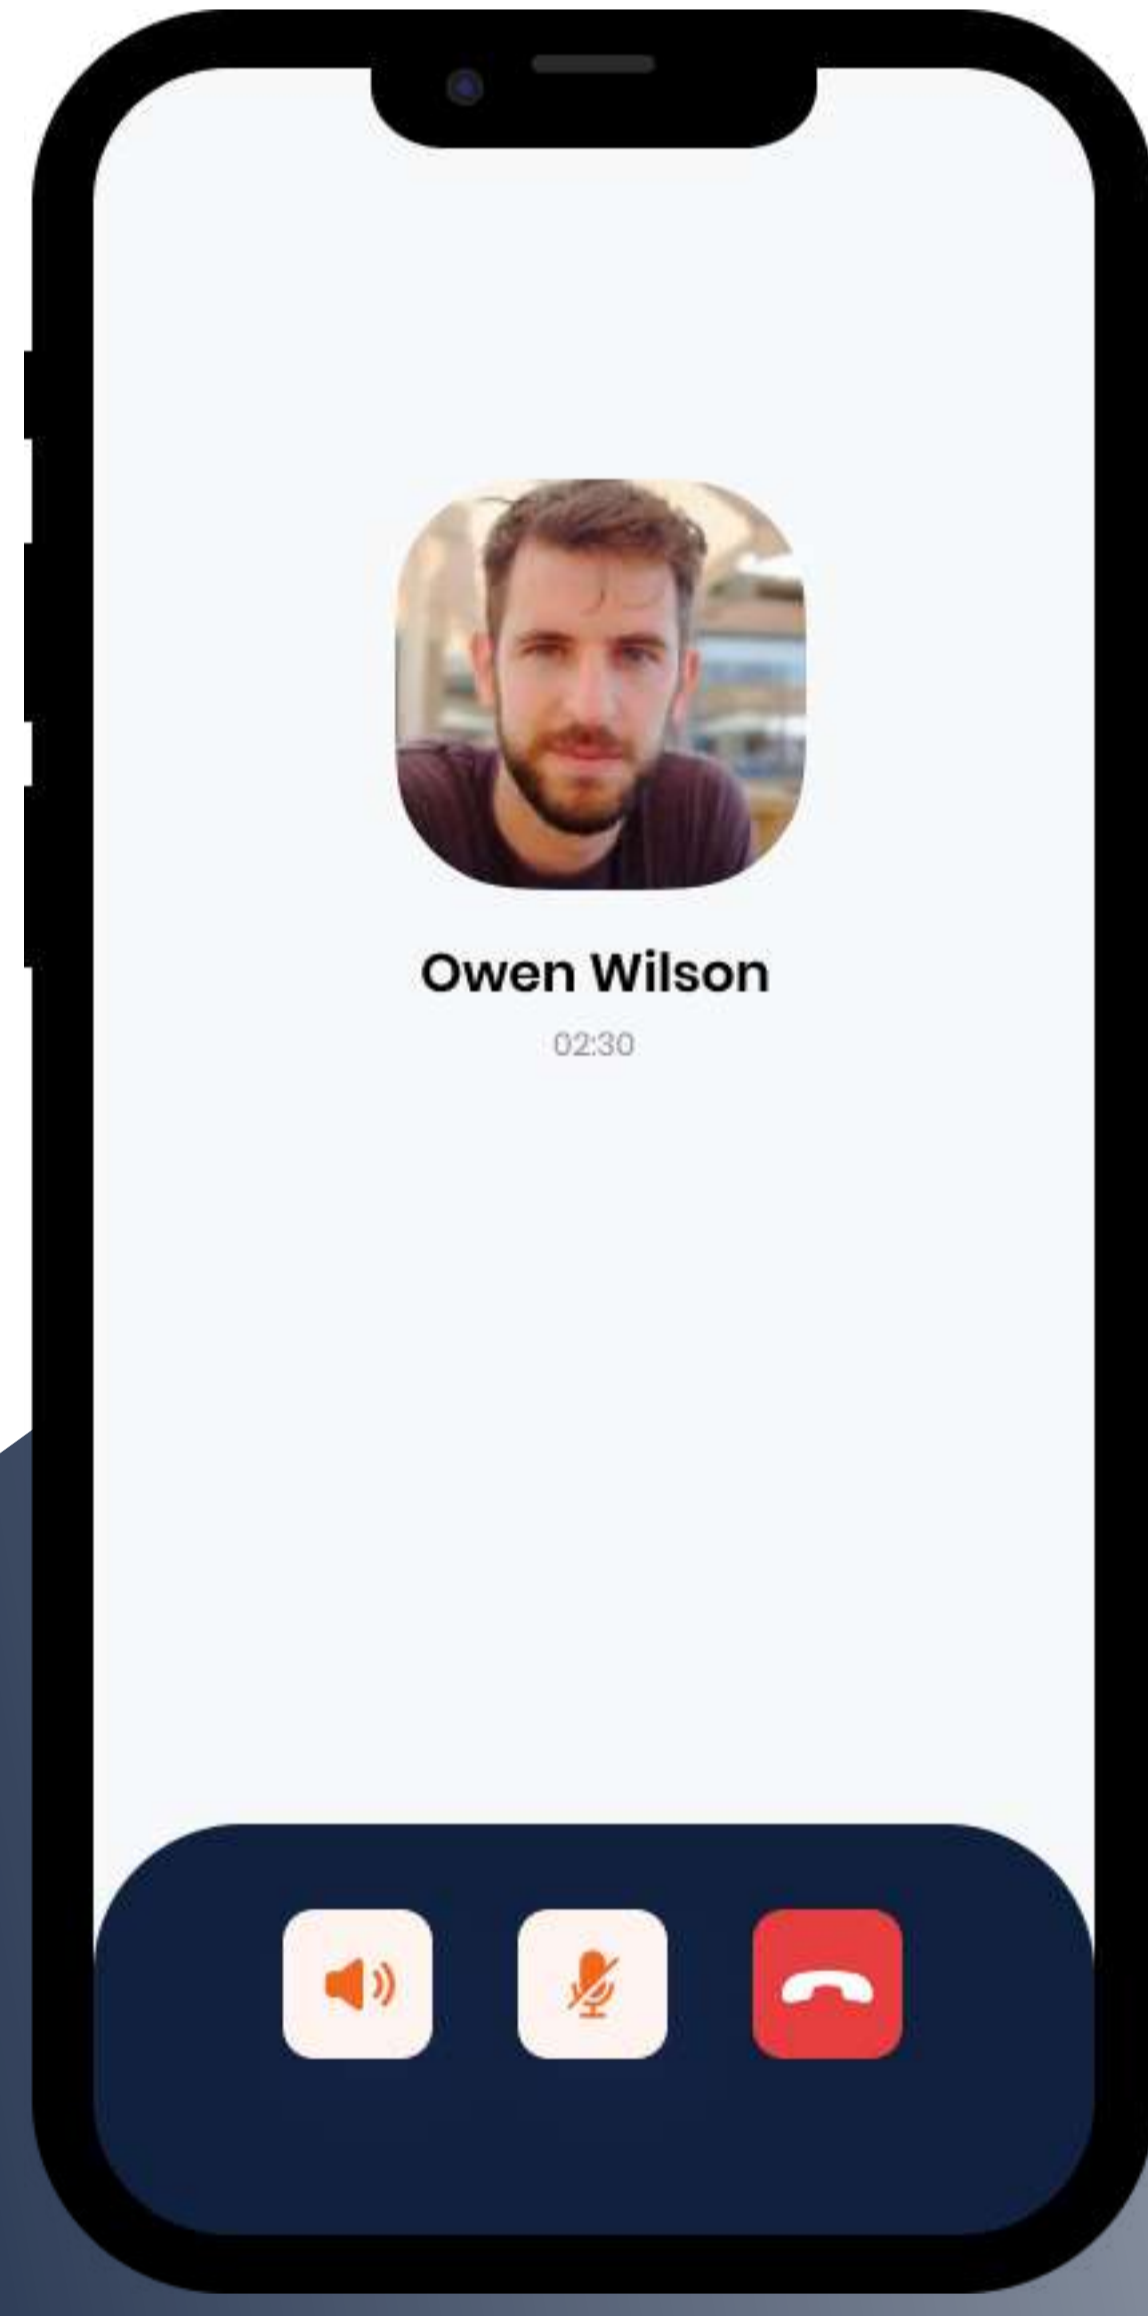

Home Screen

The home screen would likely provide quick access to the most important features of the app, such as schedules, routines, Media, Call and Chat. It is designed in a unique way for Clients, Trainers and admin. Additionally, the app would likely include features such as notifications and alerts to help pet owners stay on top of their responsibilities and ensure the health and well-being of their pets.

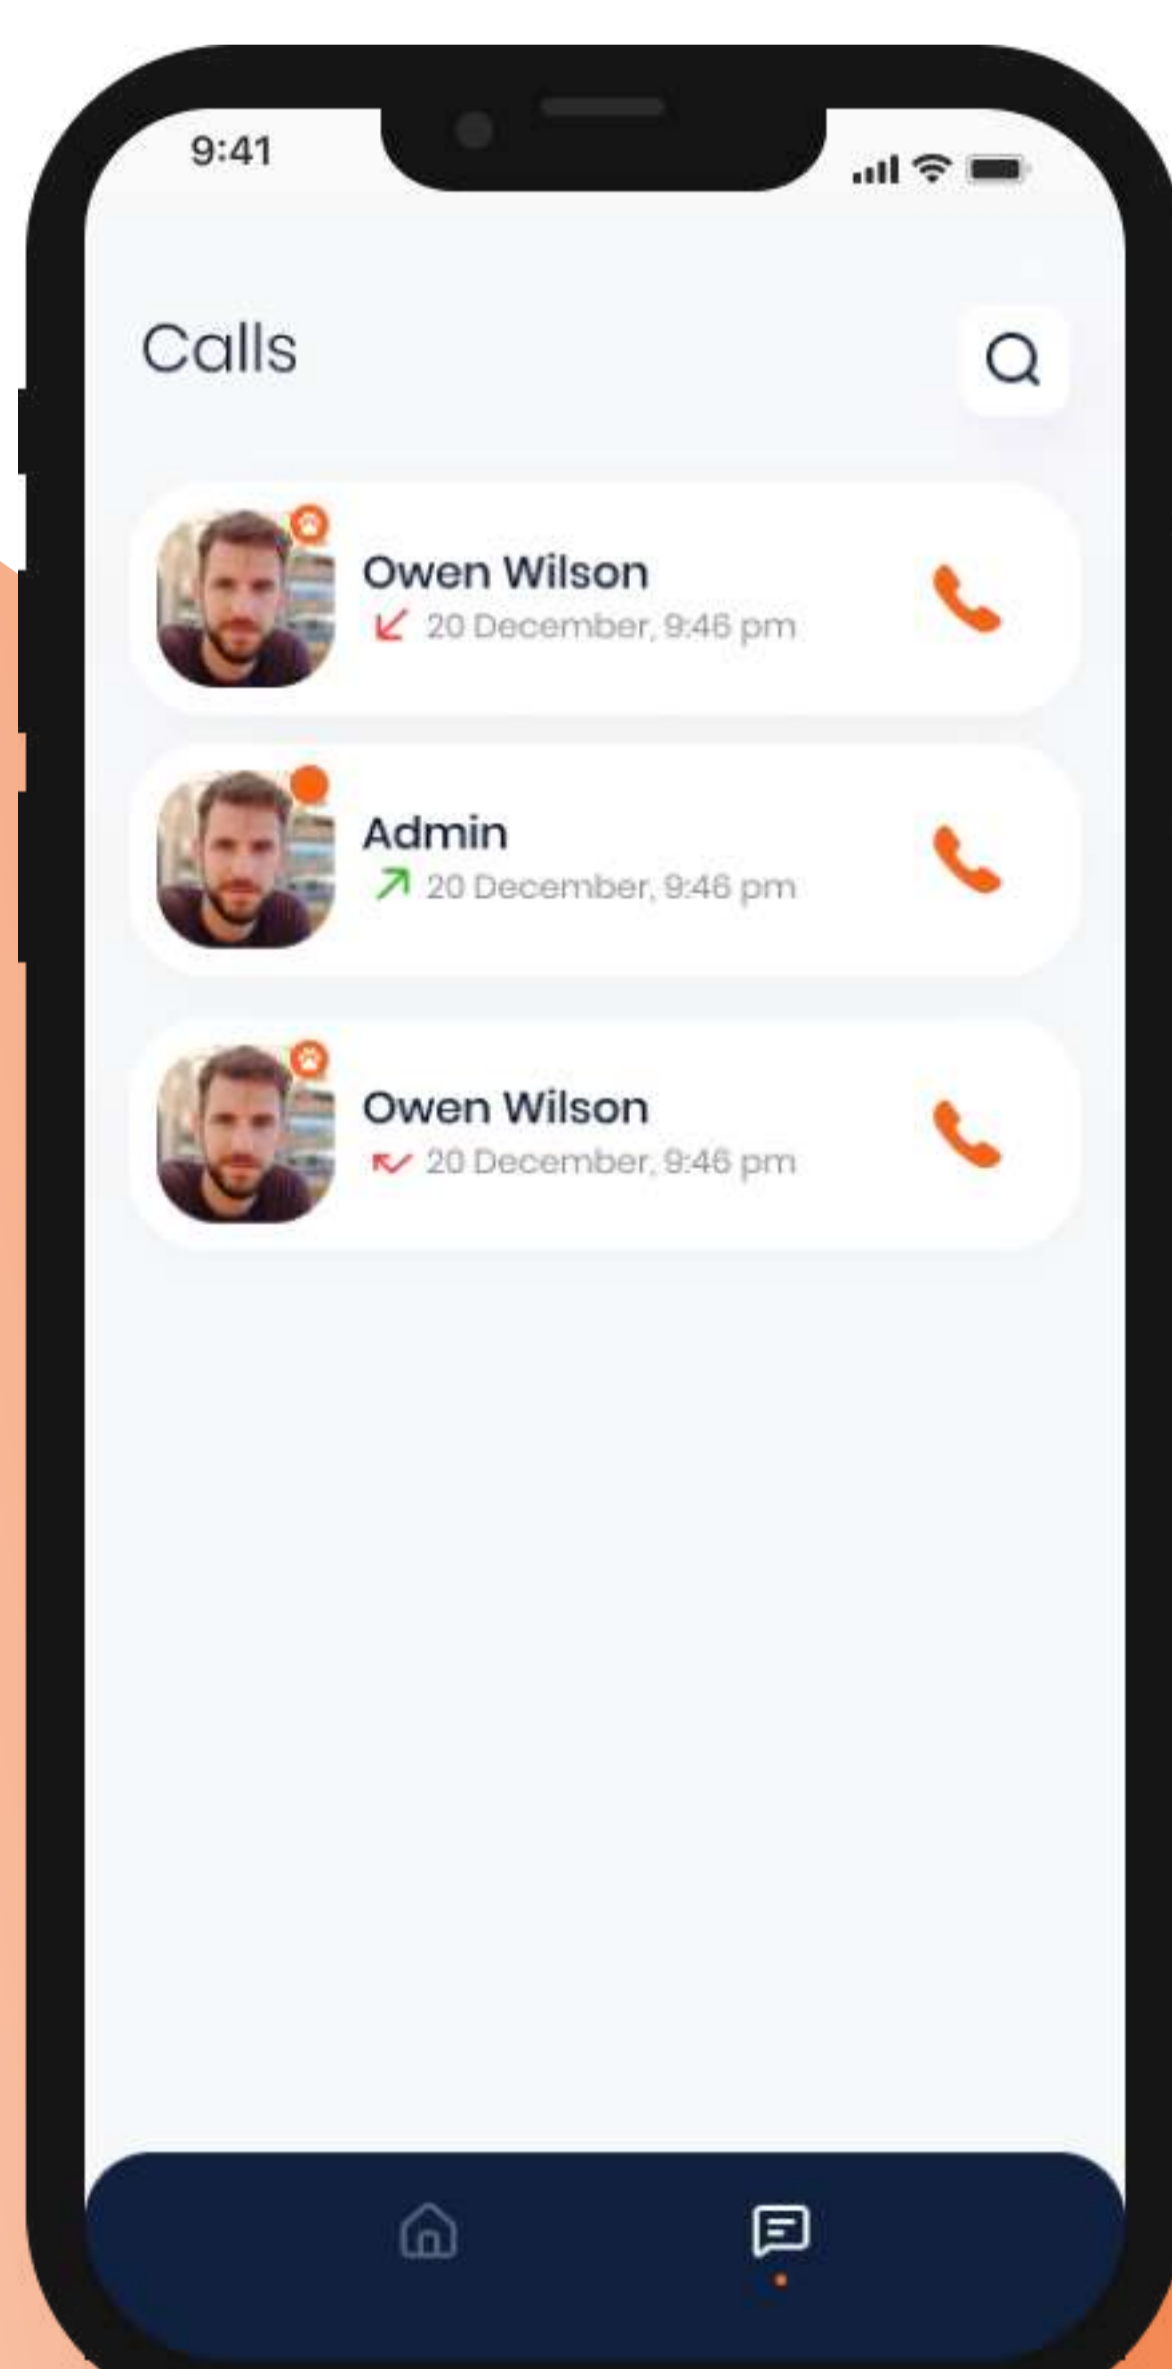

In App Call

An in-app call is a feature that allows client/trainer to make voice calls directly within the app. This means that you don't have to switch to another app or use a different program to make the call, as it can be done right within the app itself.

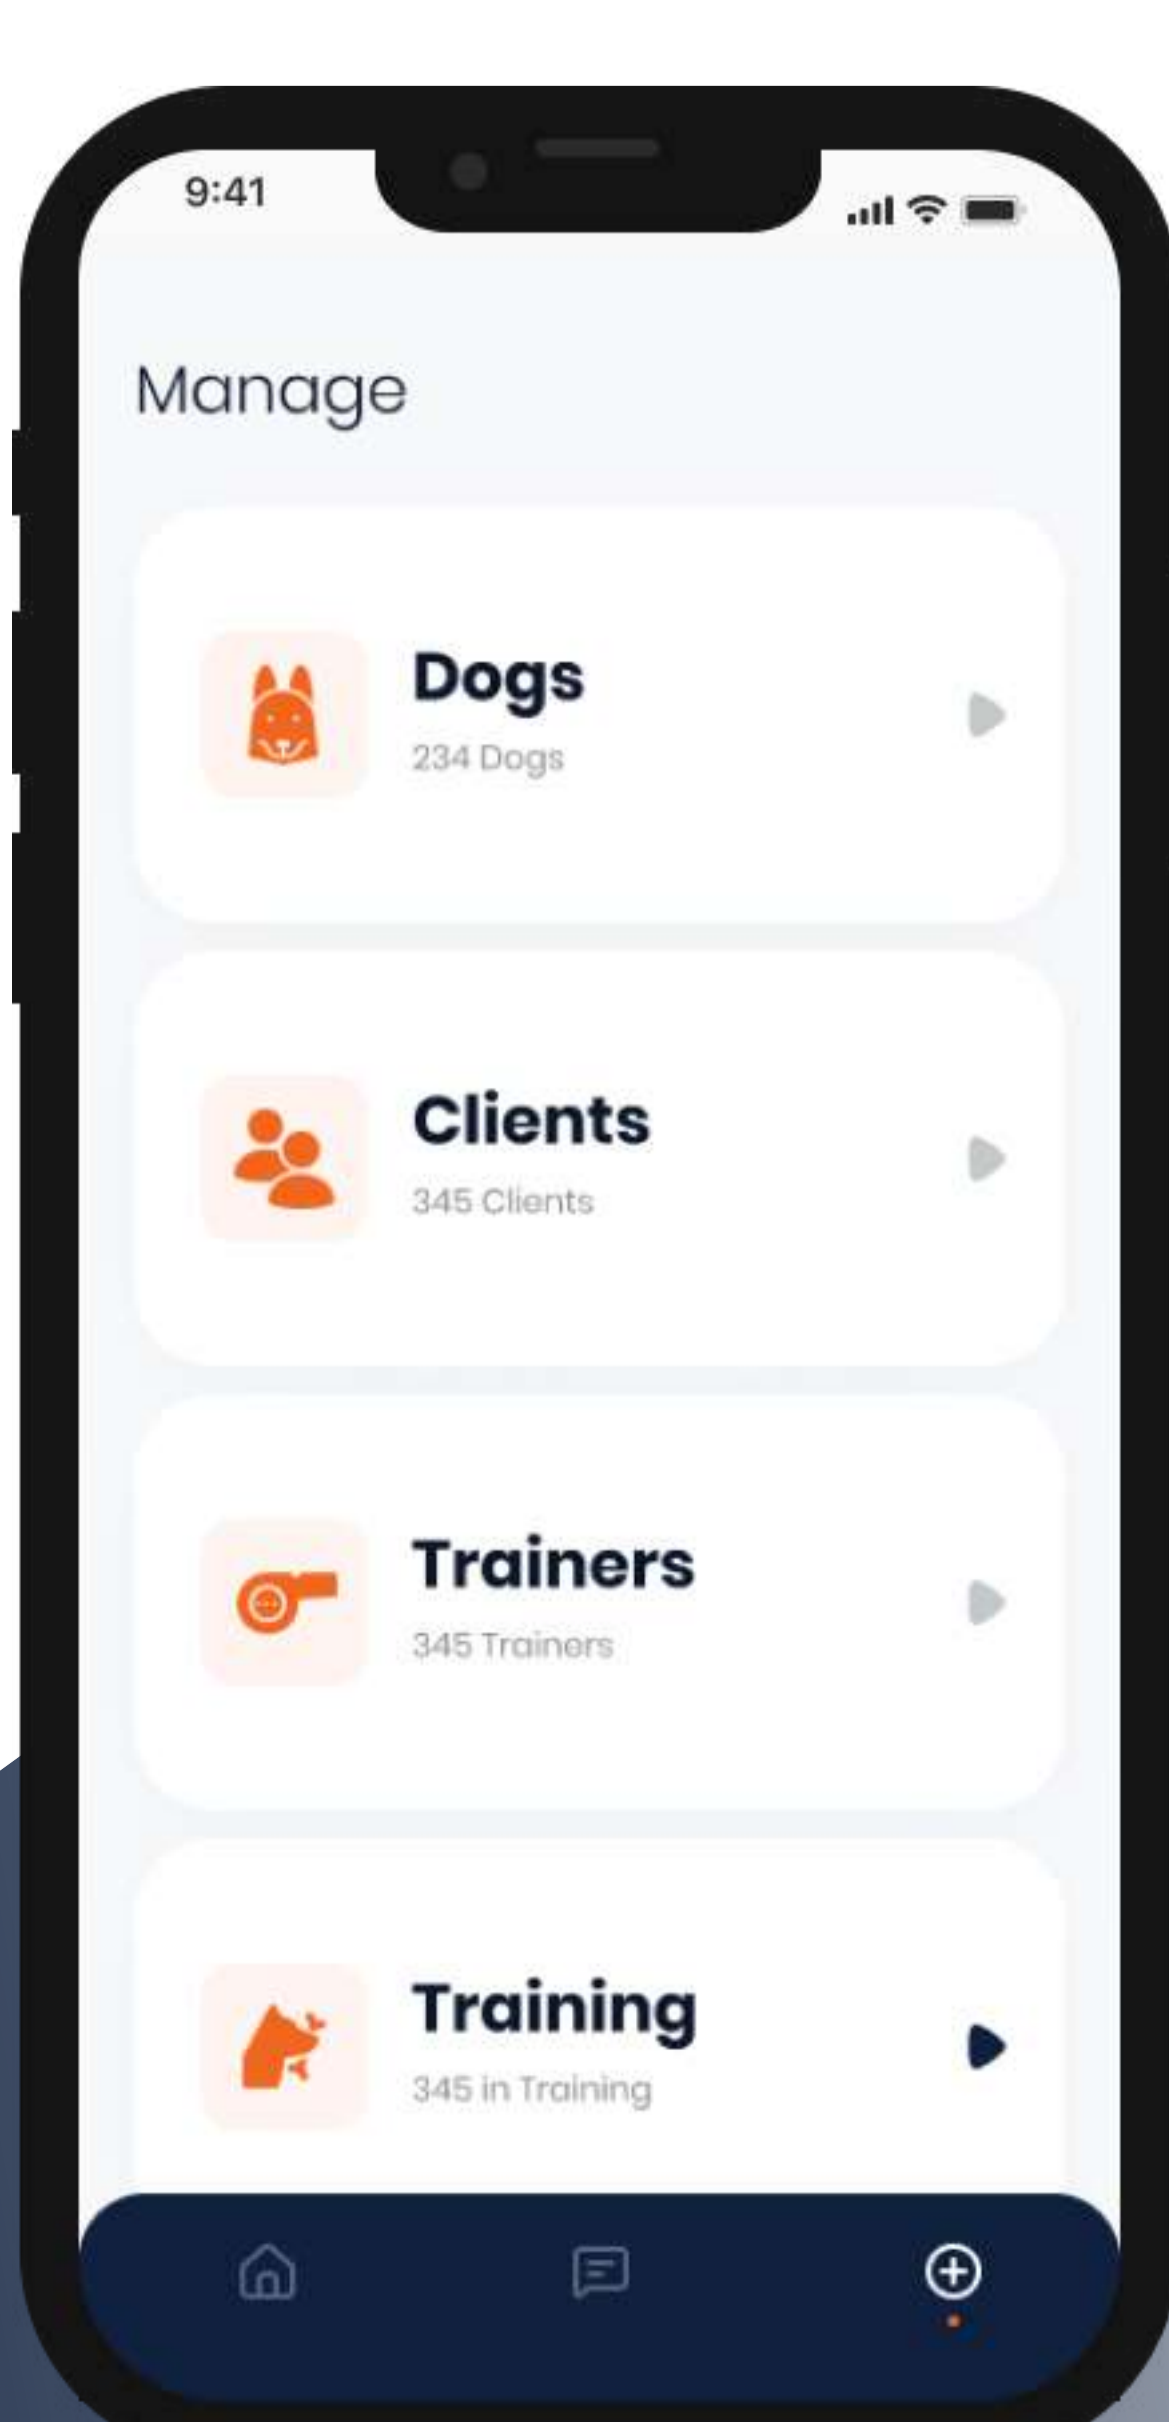

Chatting with Trainer/Customer

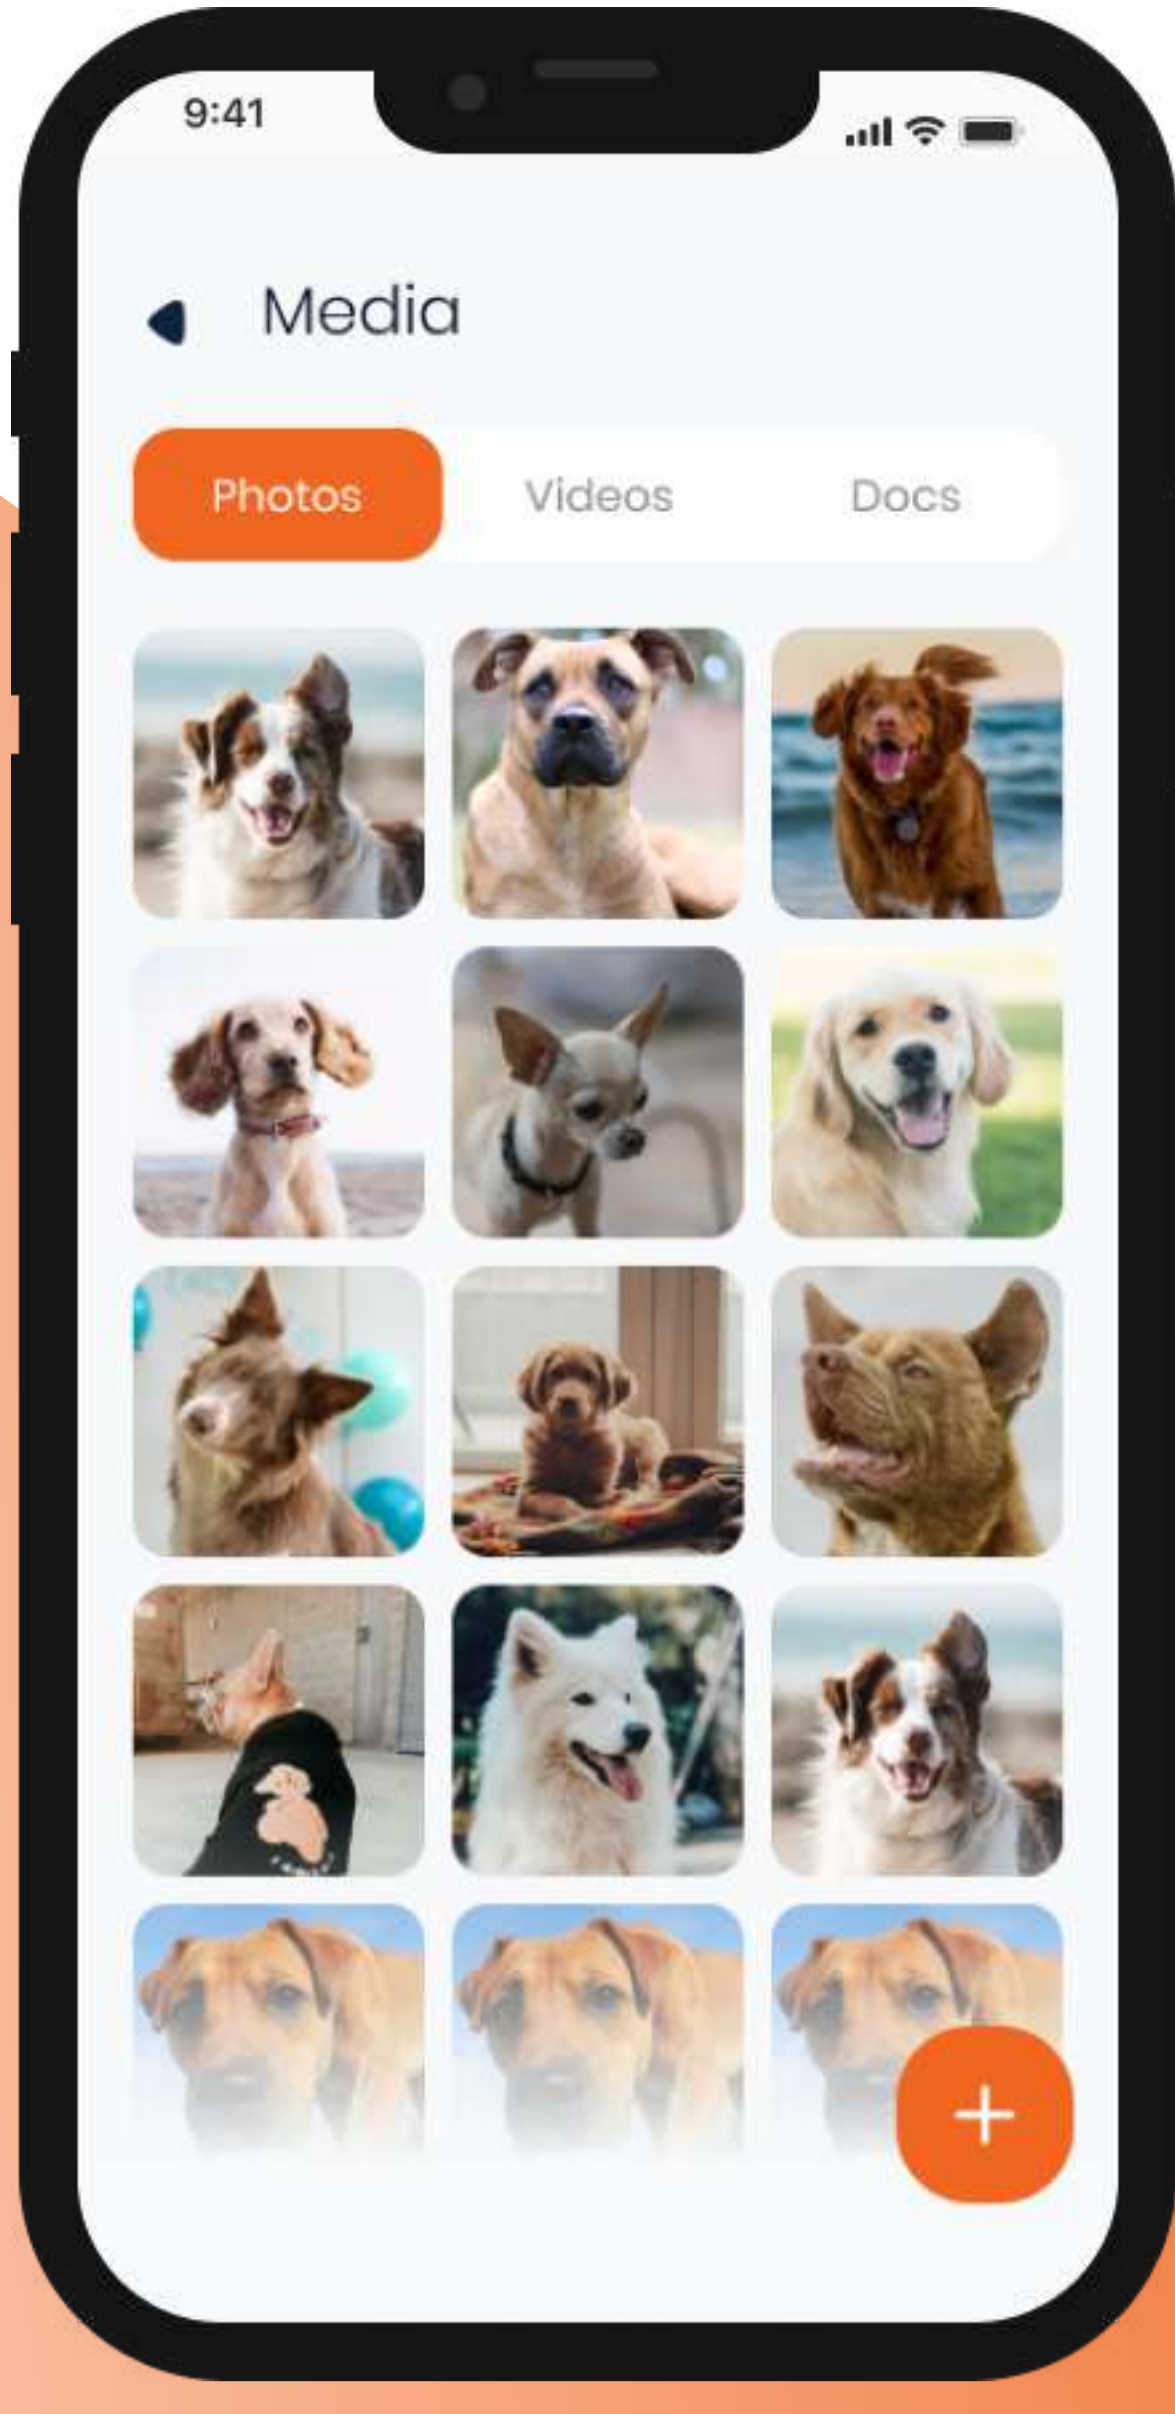

chatting with a trainer can be a great way to get expert advice on how to train and care for your furry friend. During a conversation with a trainer, you can ask questions and discuss any concerns you may have regarding your dog's behavior, training, nutrition, and overall well-being.

Manage Trainings

Managing dog training is the process of evaluating training programs to ensure that dogs receive the training necessary to become well-behaved and obedient companions. client/trainer can view and Schedule the dog training

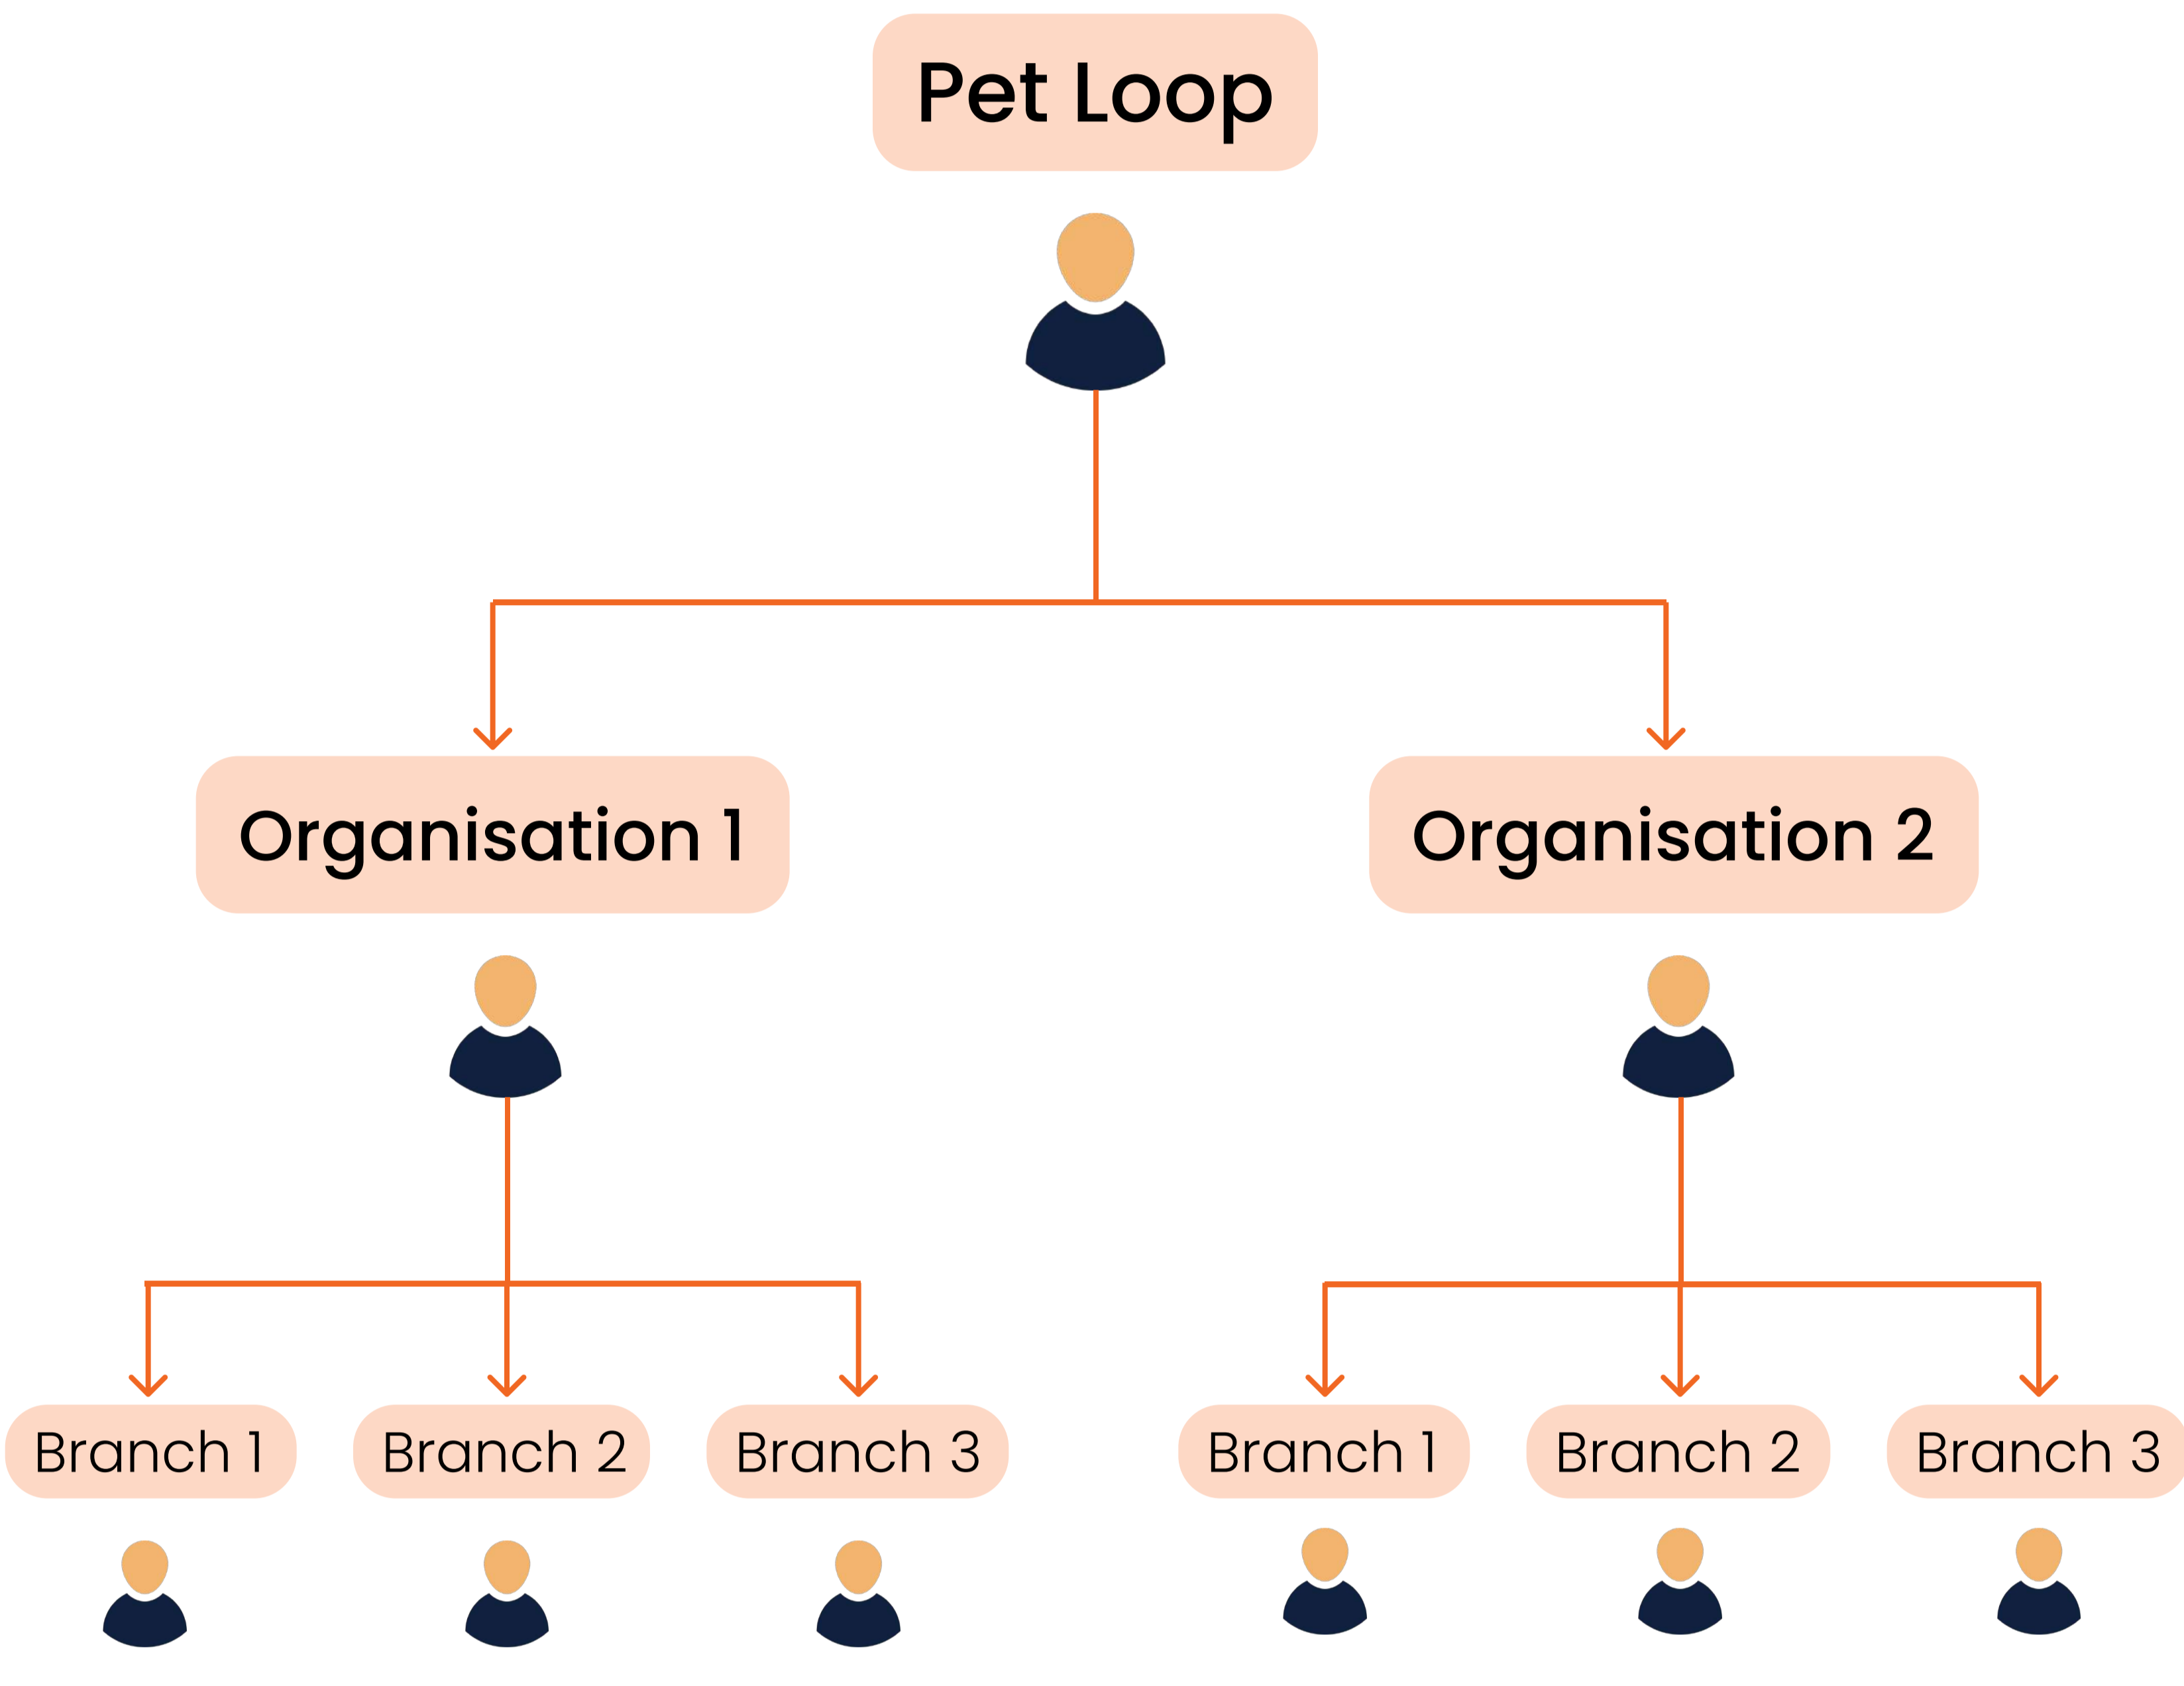

Media in cloud

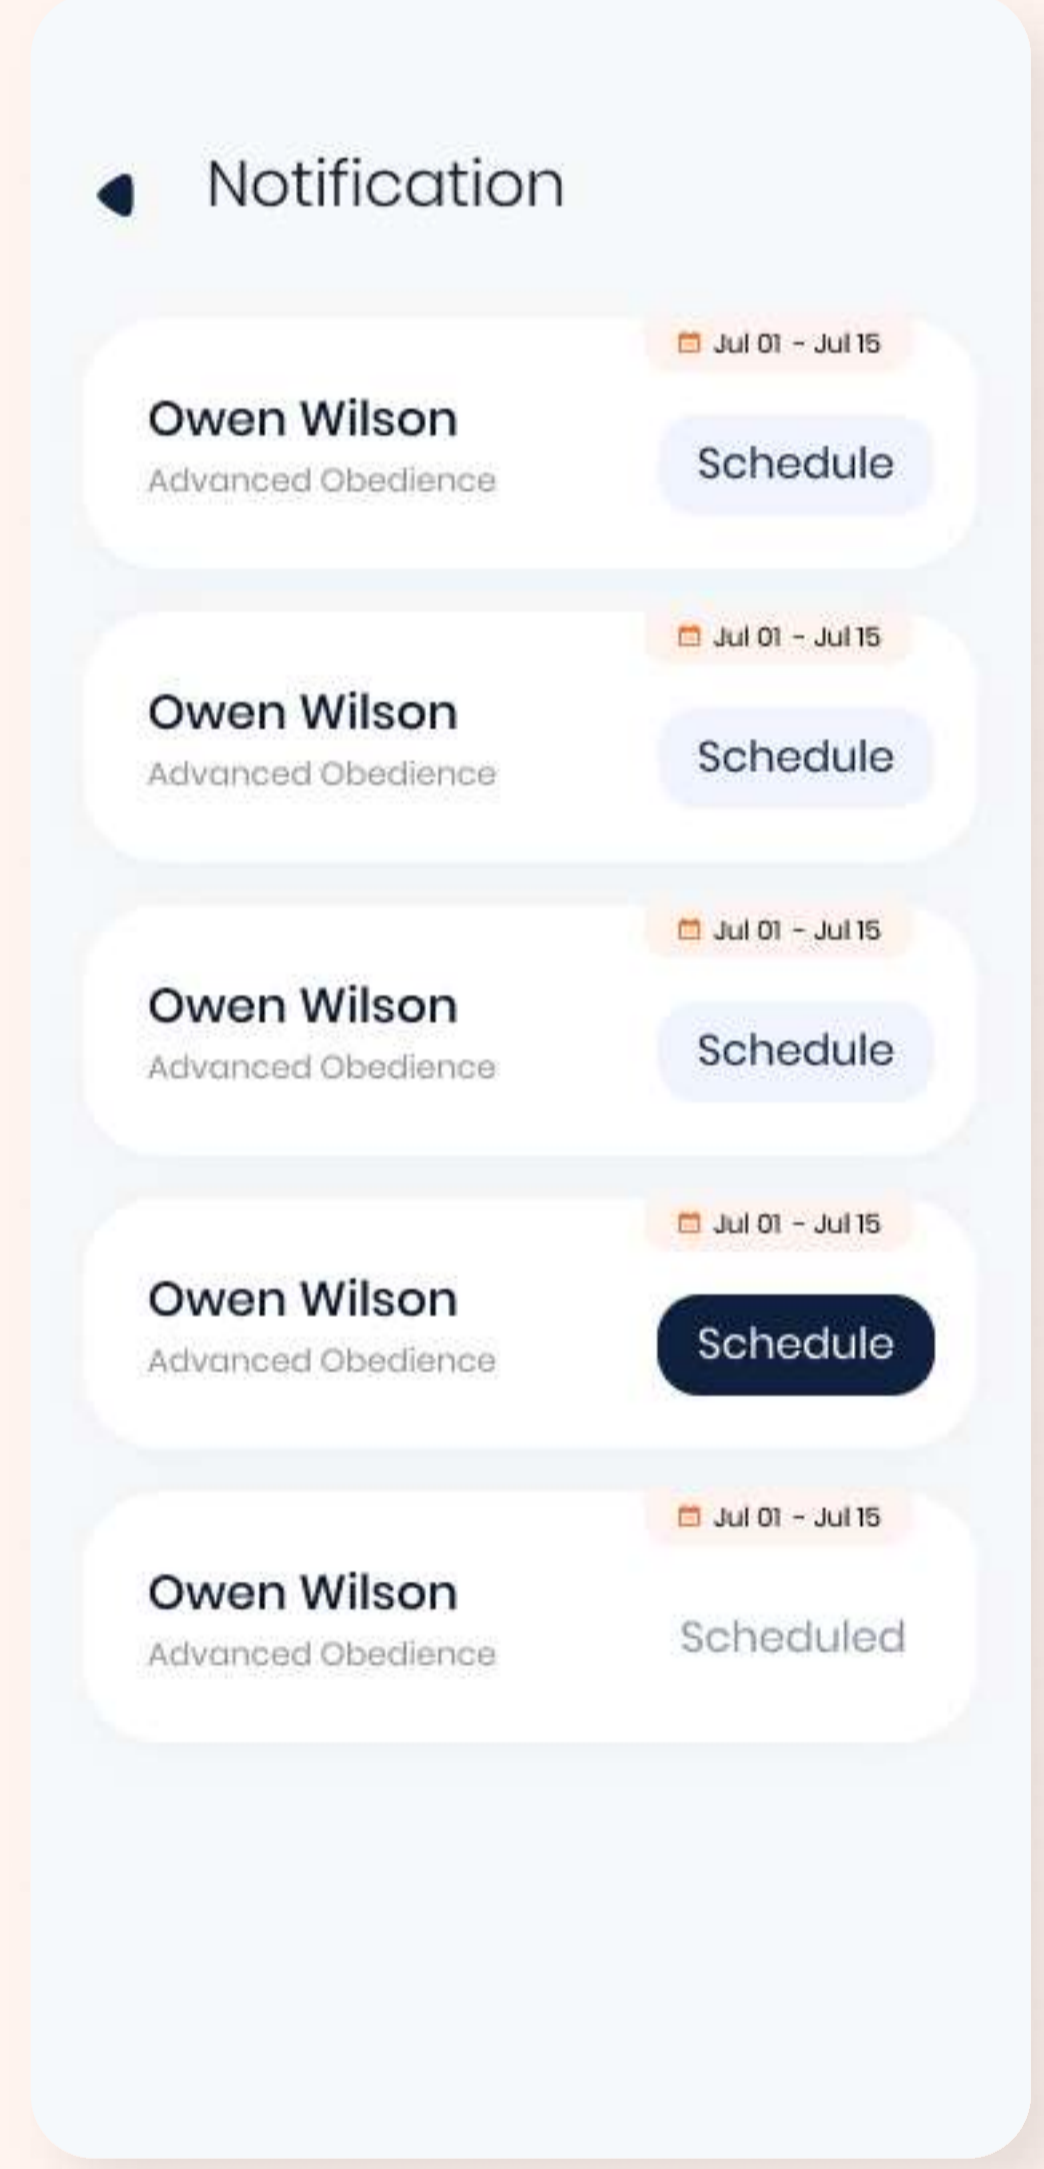

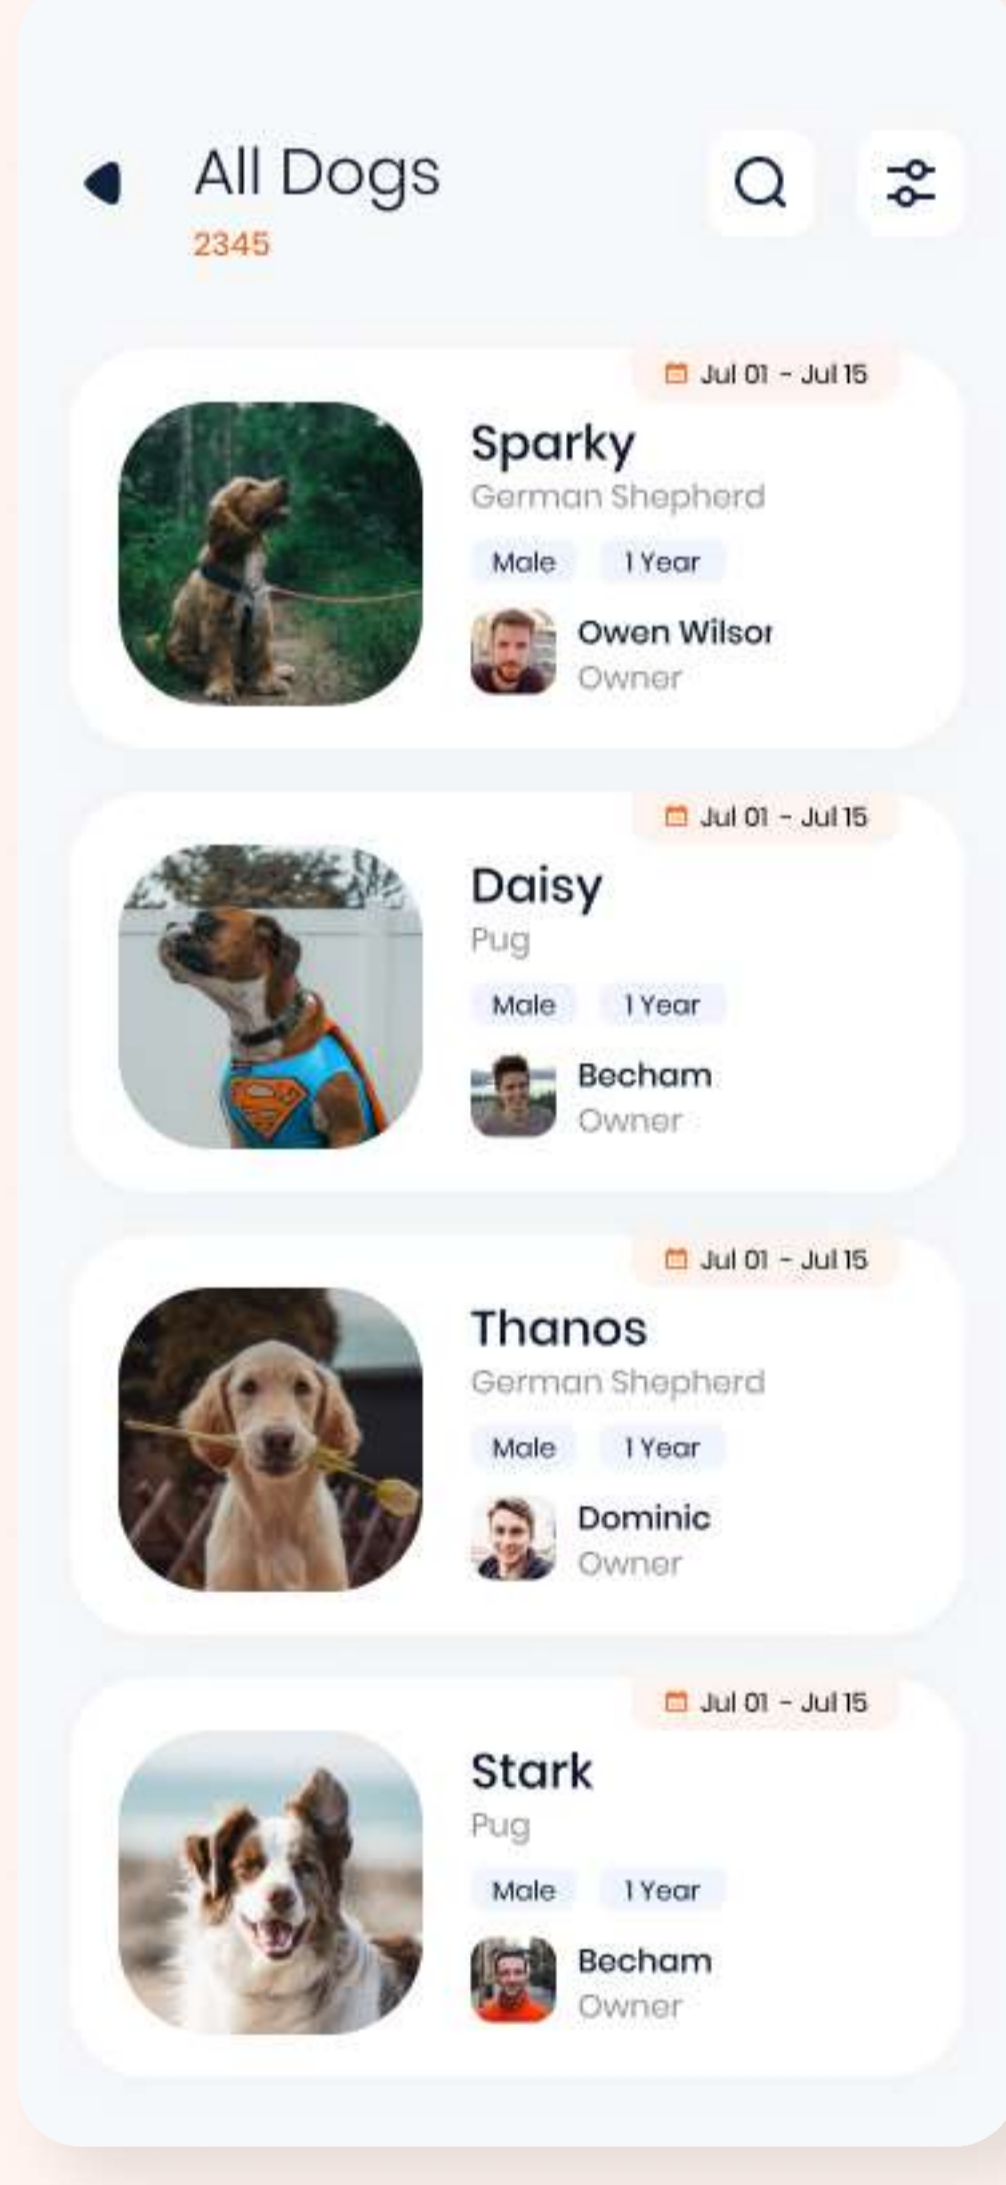

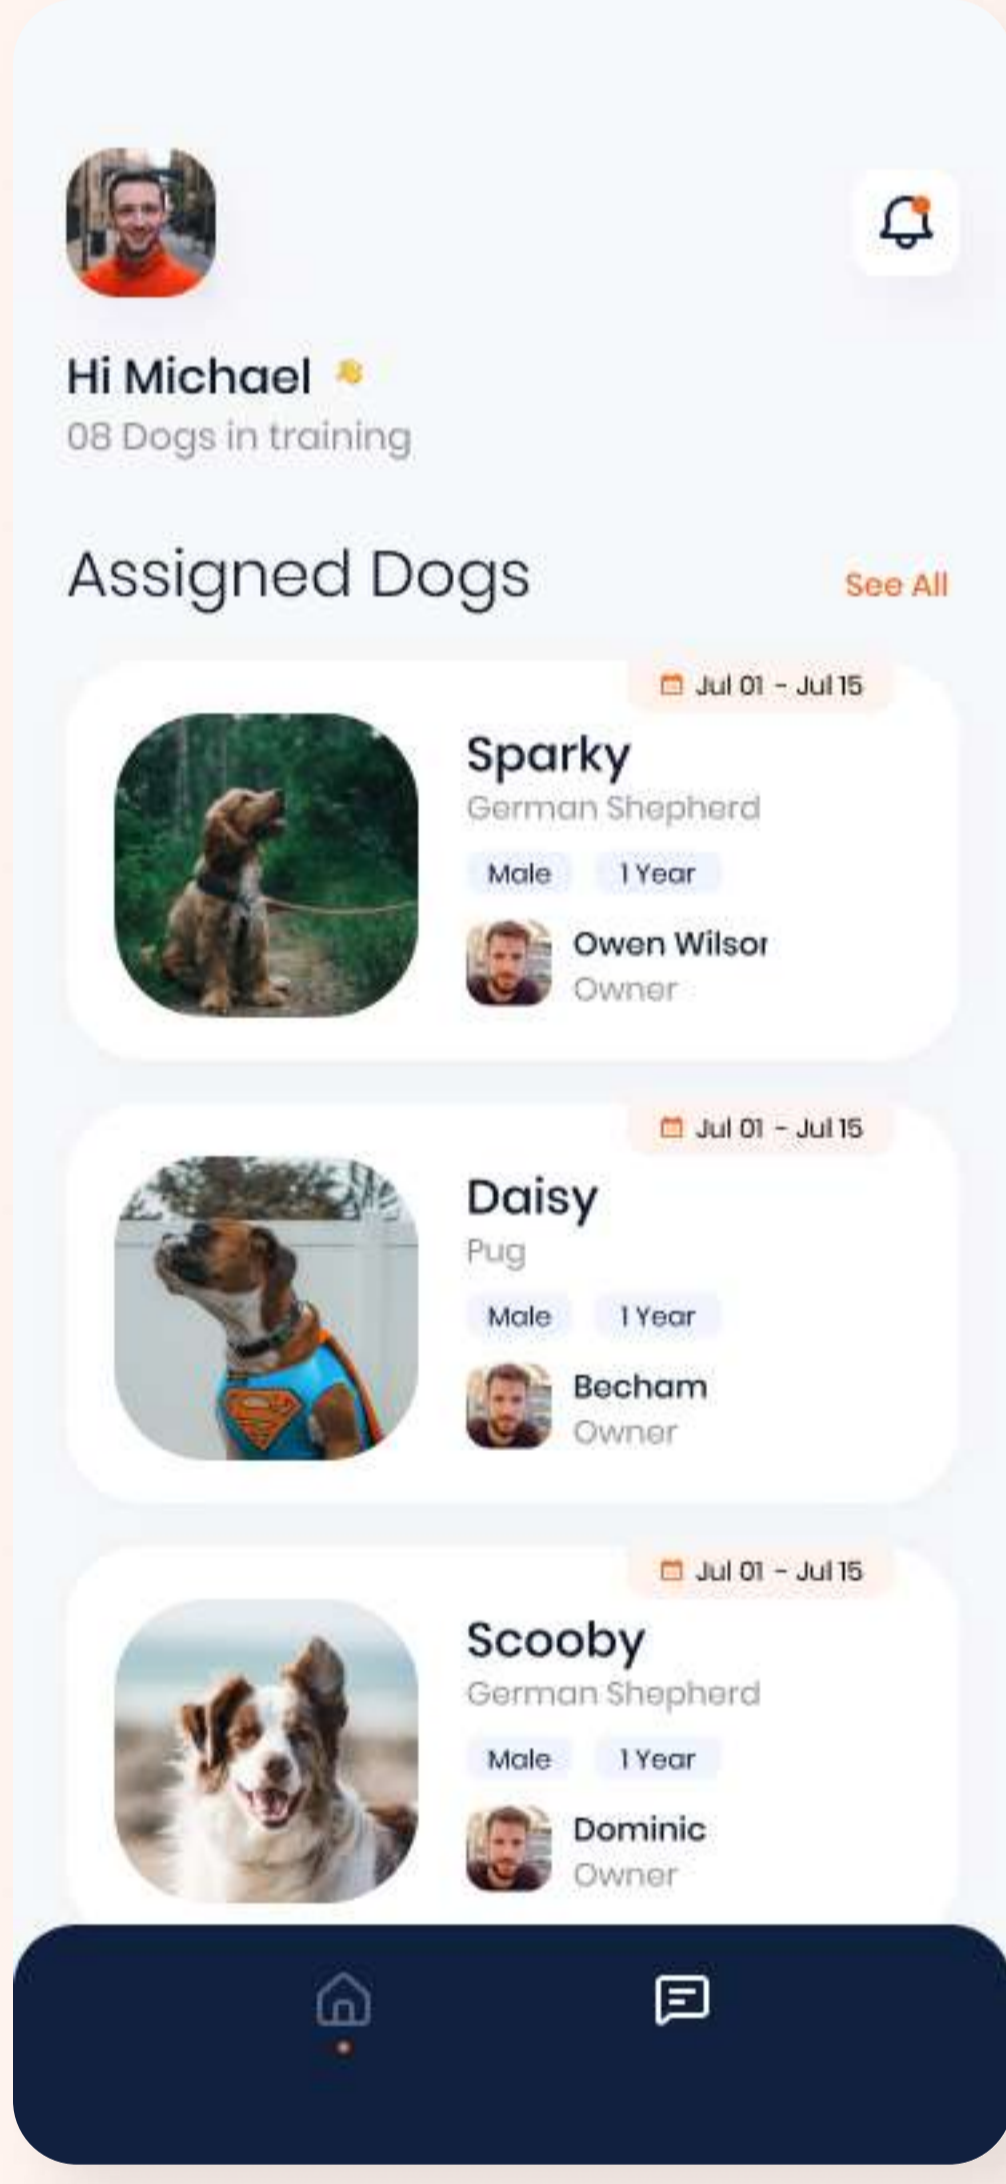

Media in the cloud helps in the storage and delivery of digital media content, such as videos, images on remote servers accessible via the internet. Here client/trainer can upload or view dog's images, videos and other documents anywhere.

Software As a Service

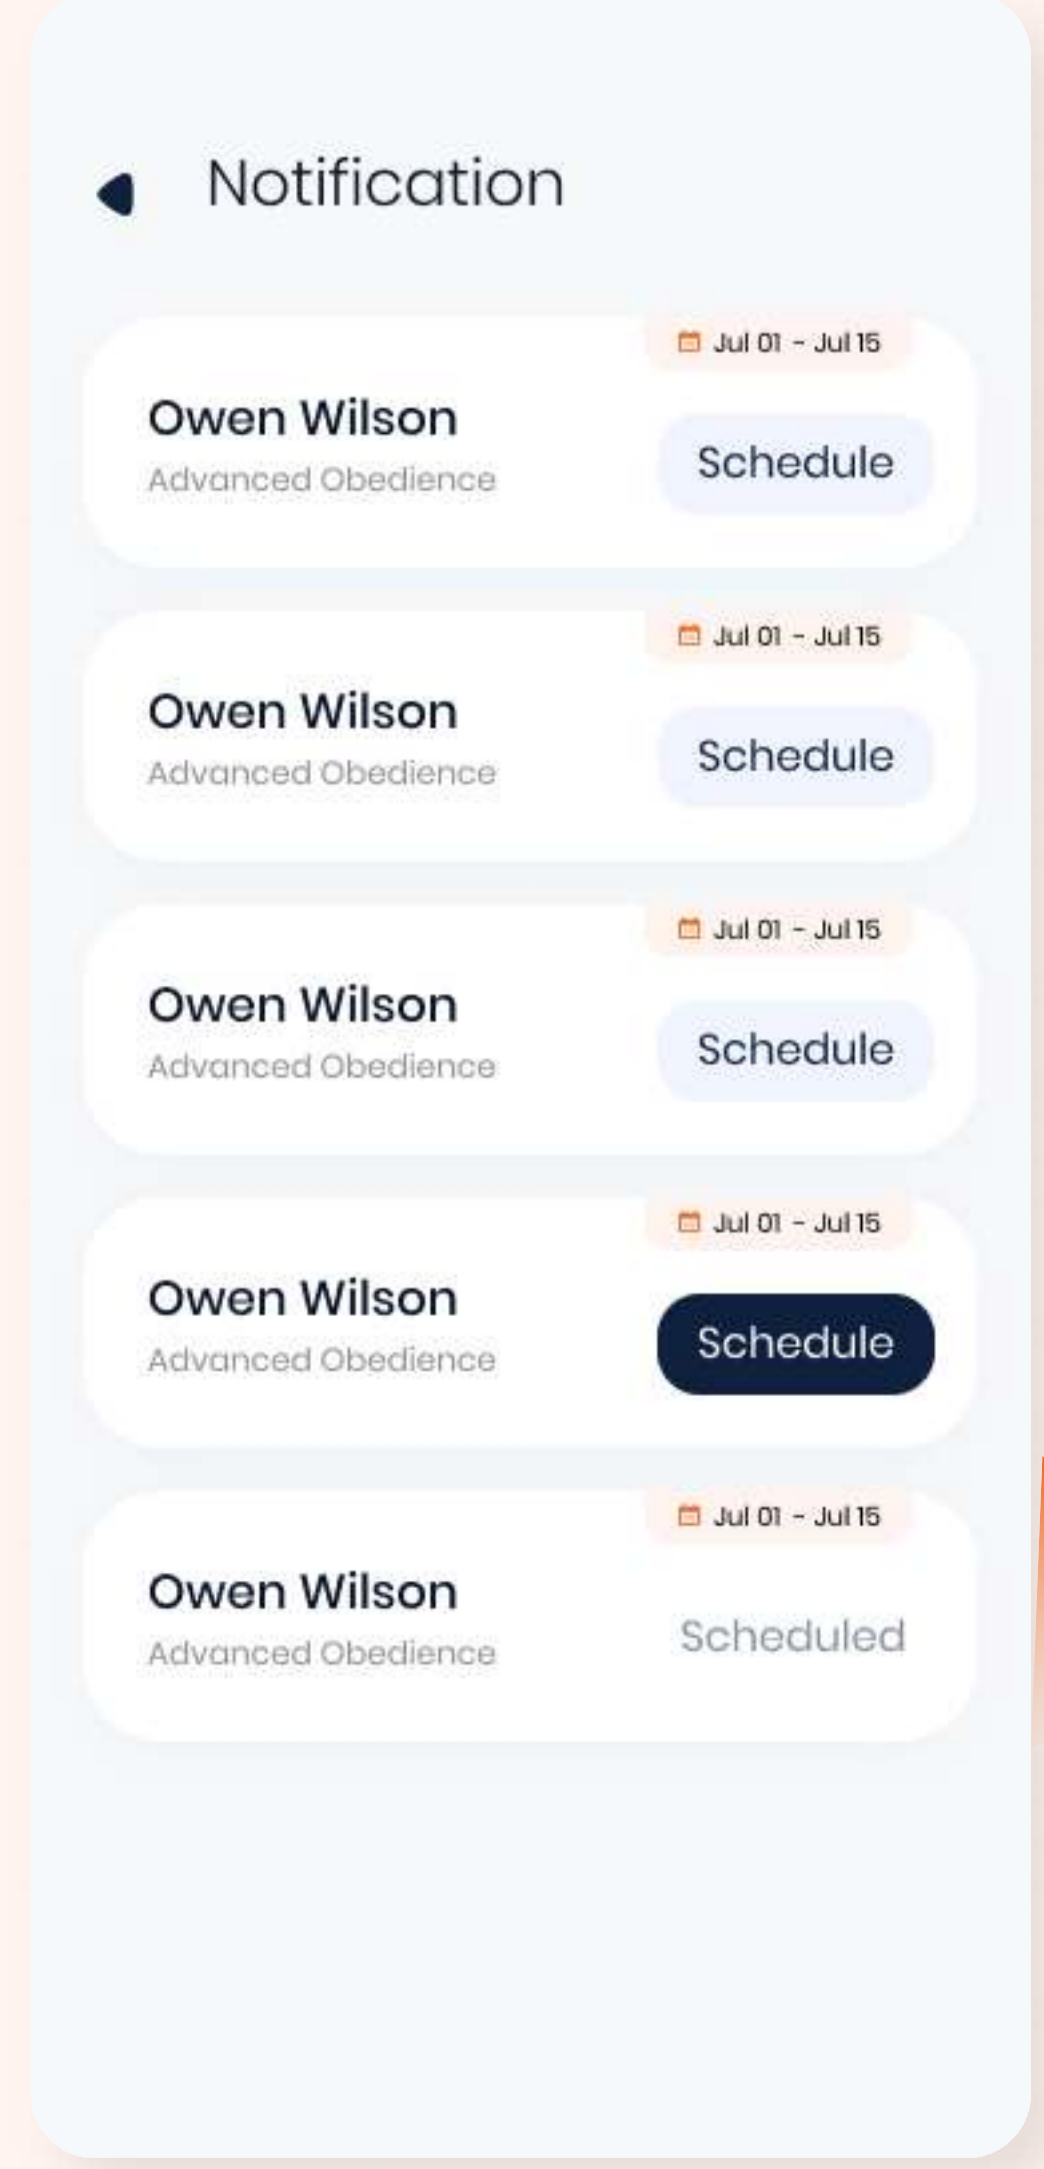

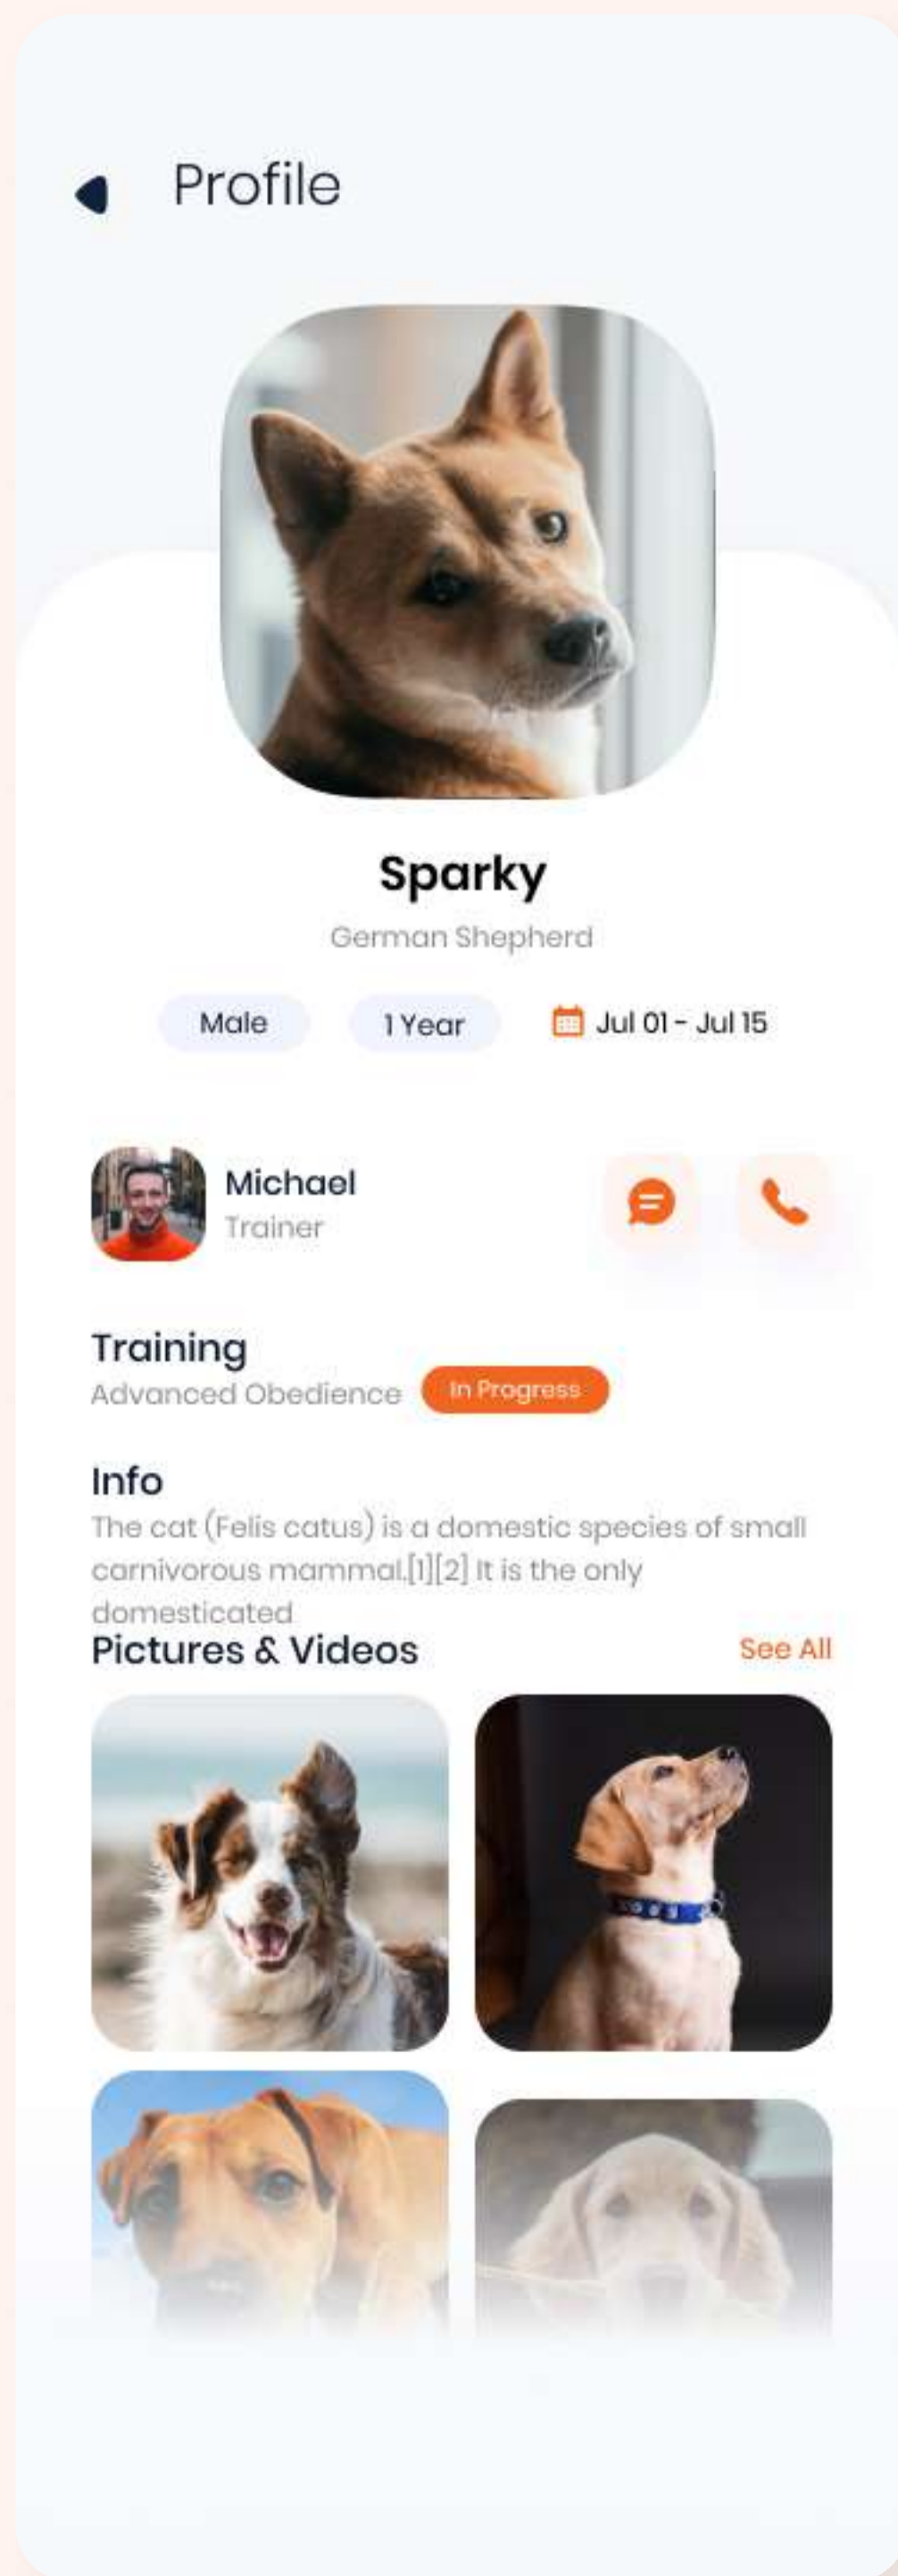

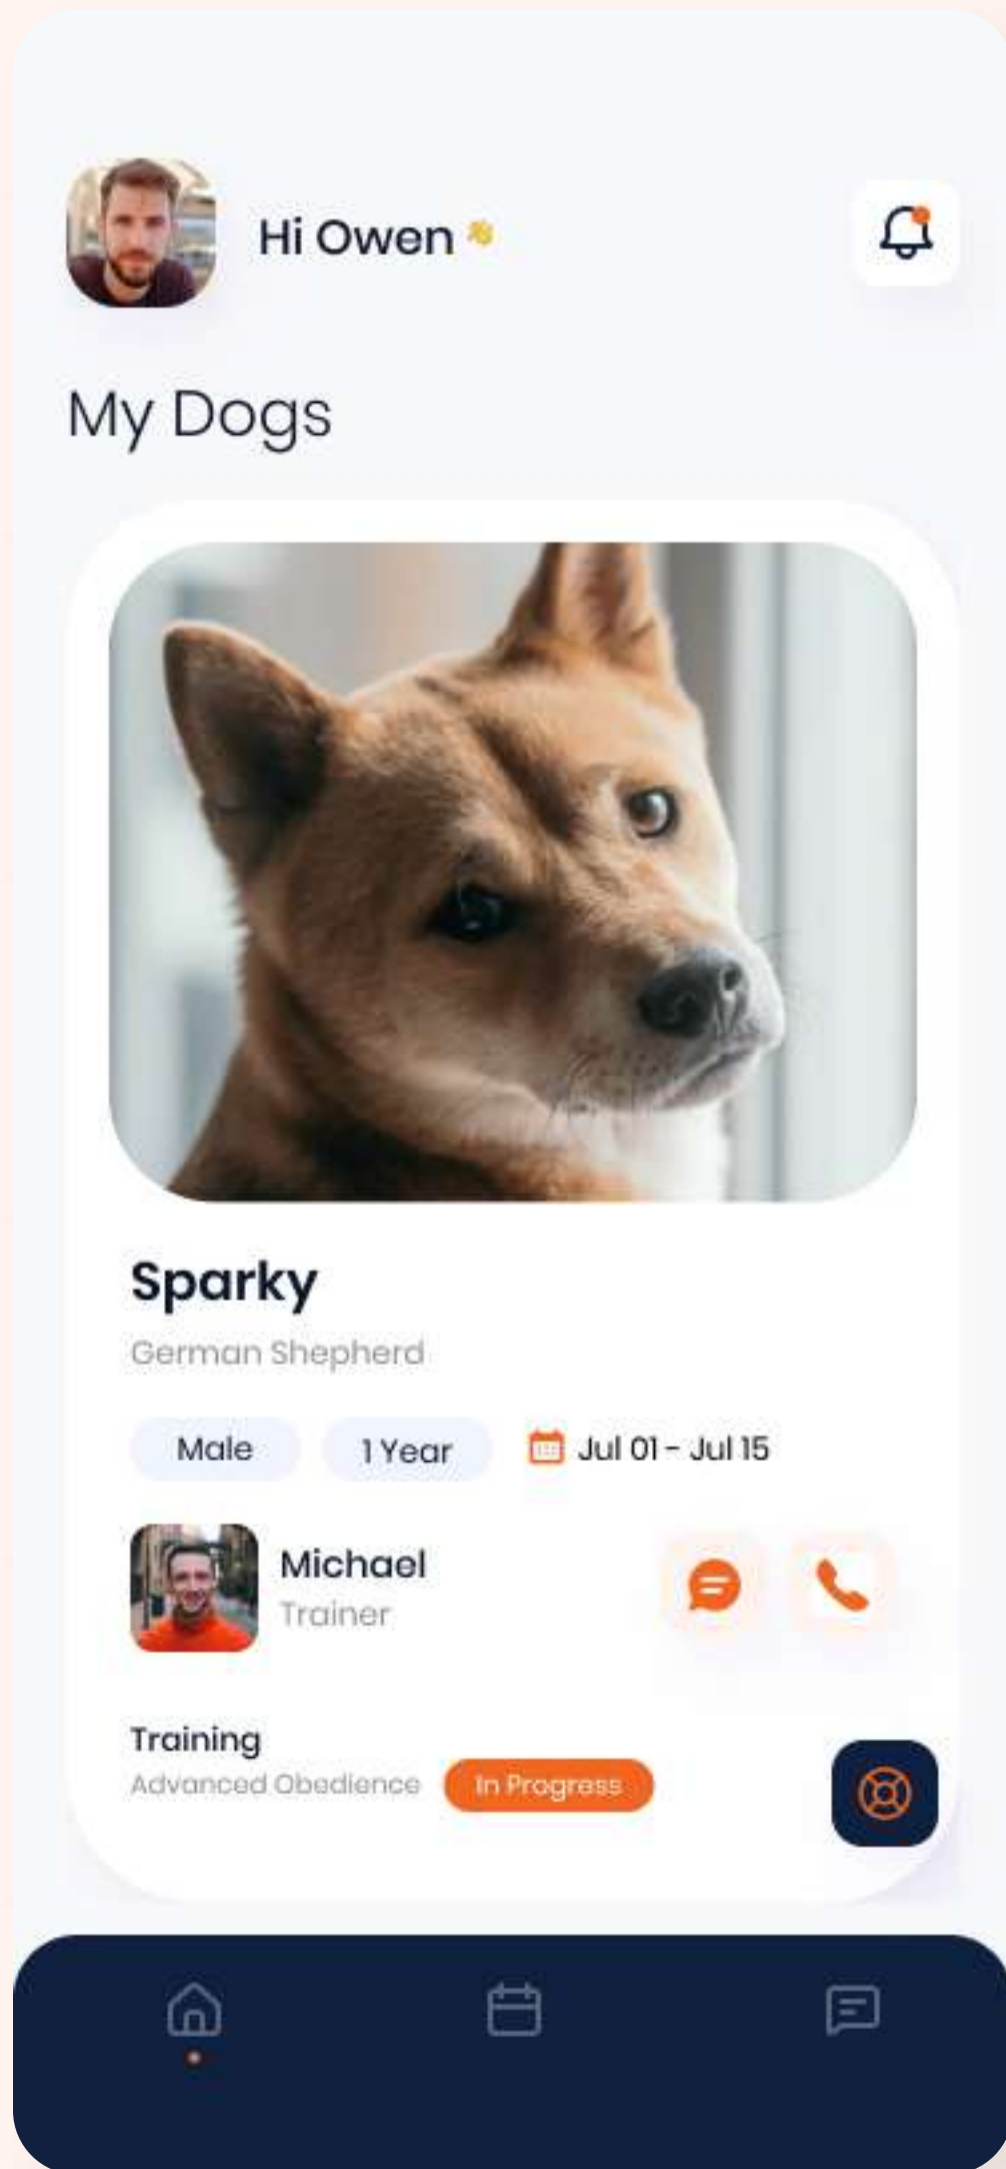

Trainer

A Pet trainer can login via the specified app provided for them in which they can view the schedule for the day, Able to connect to the respective pet's owner with a call or chat to update their day with the pet or answer to the queries raised by the clients and upload or view pet's images, Videos and other docs.

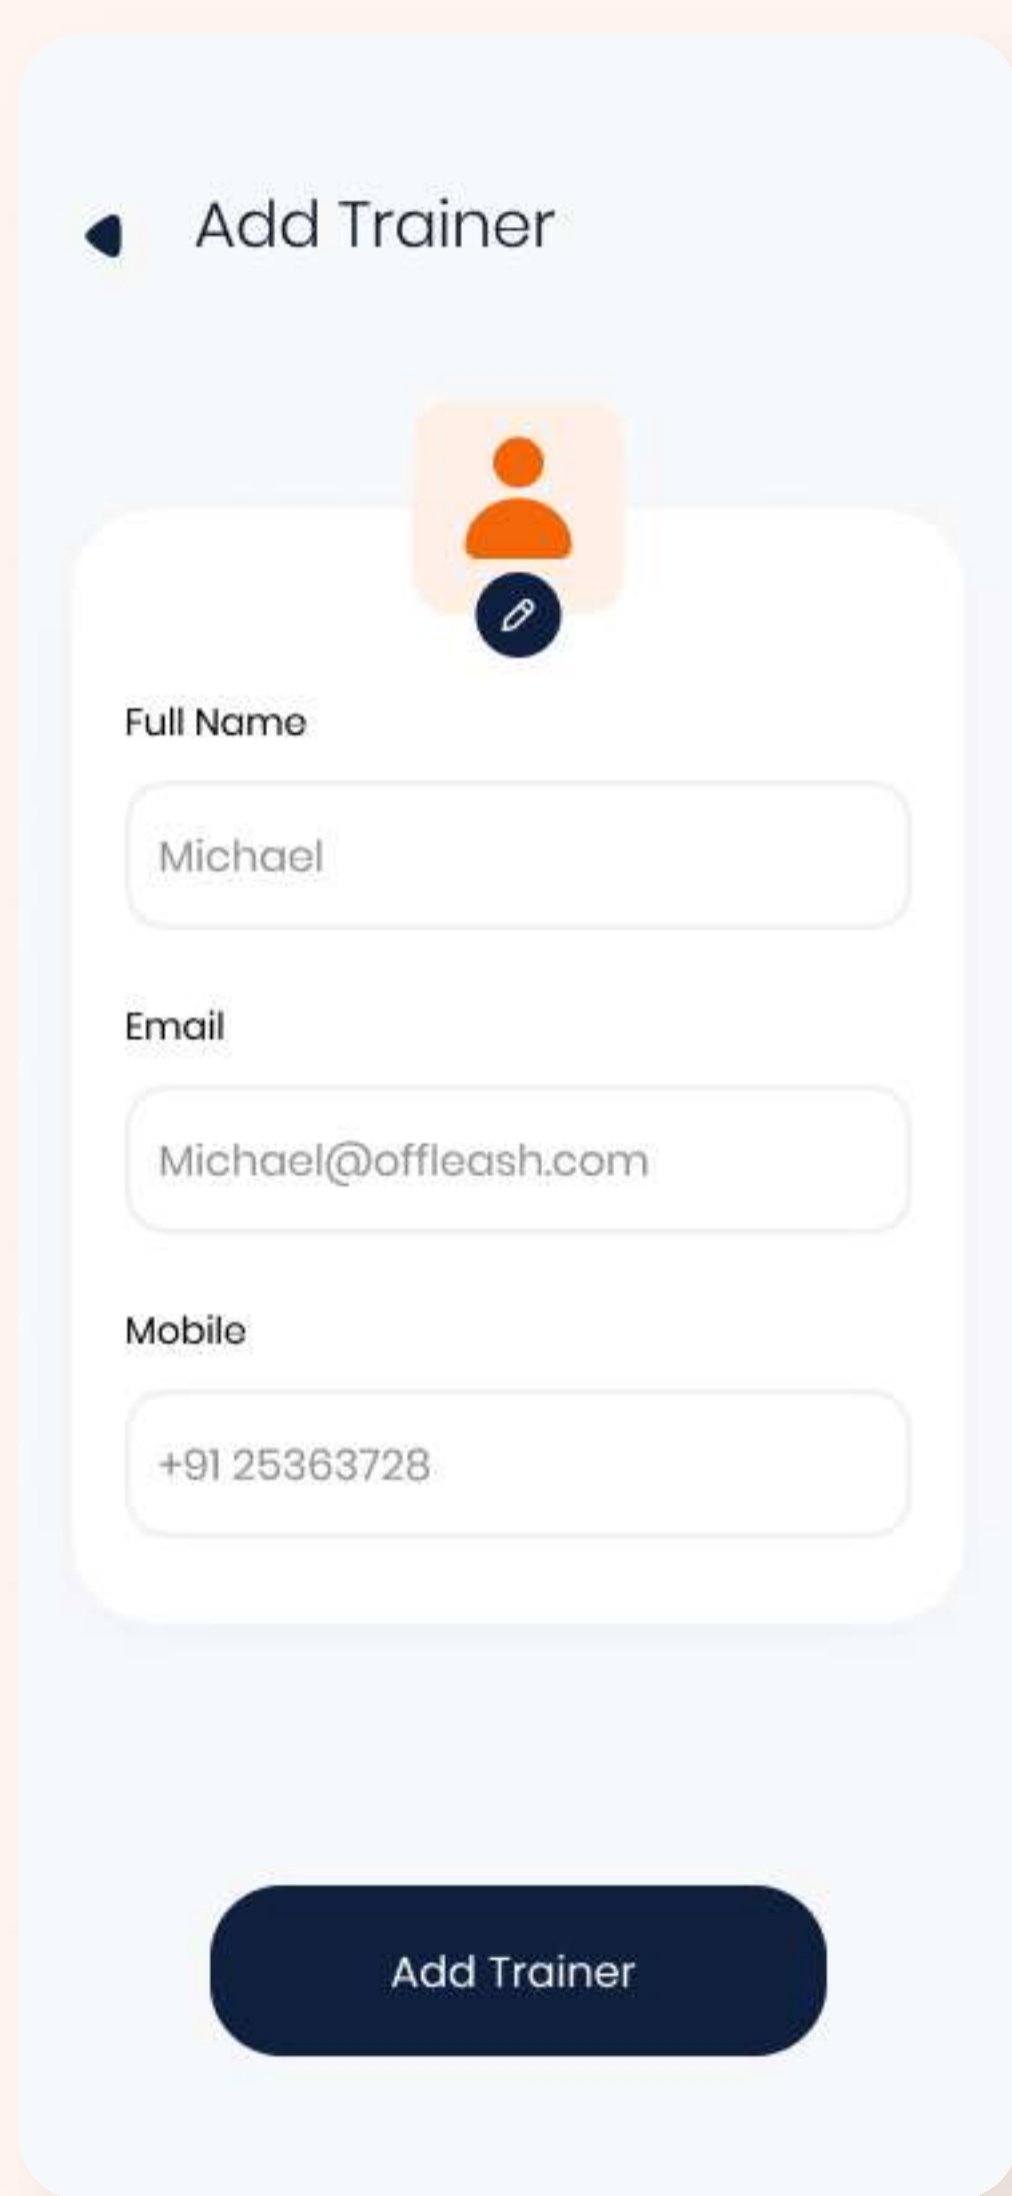

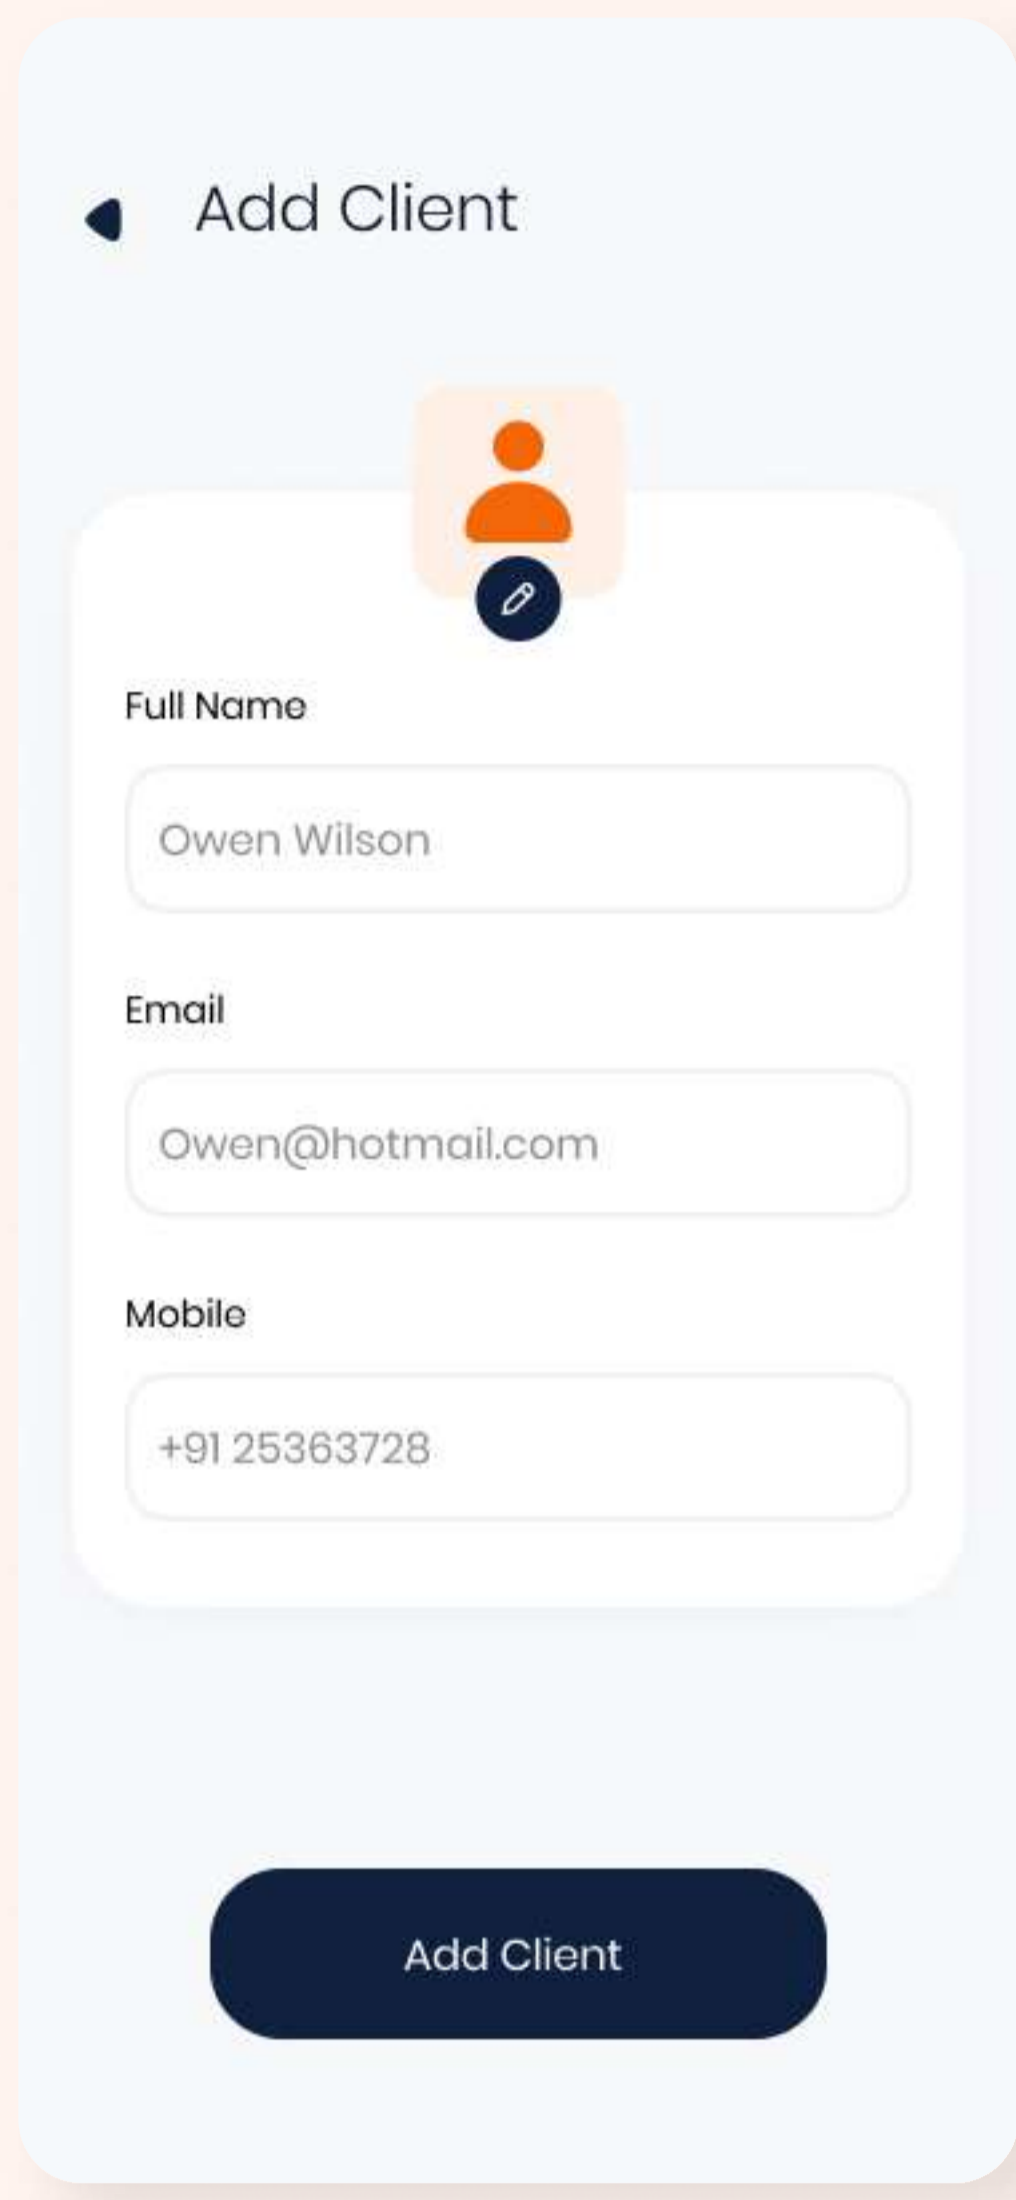

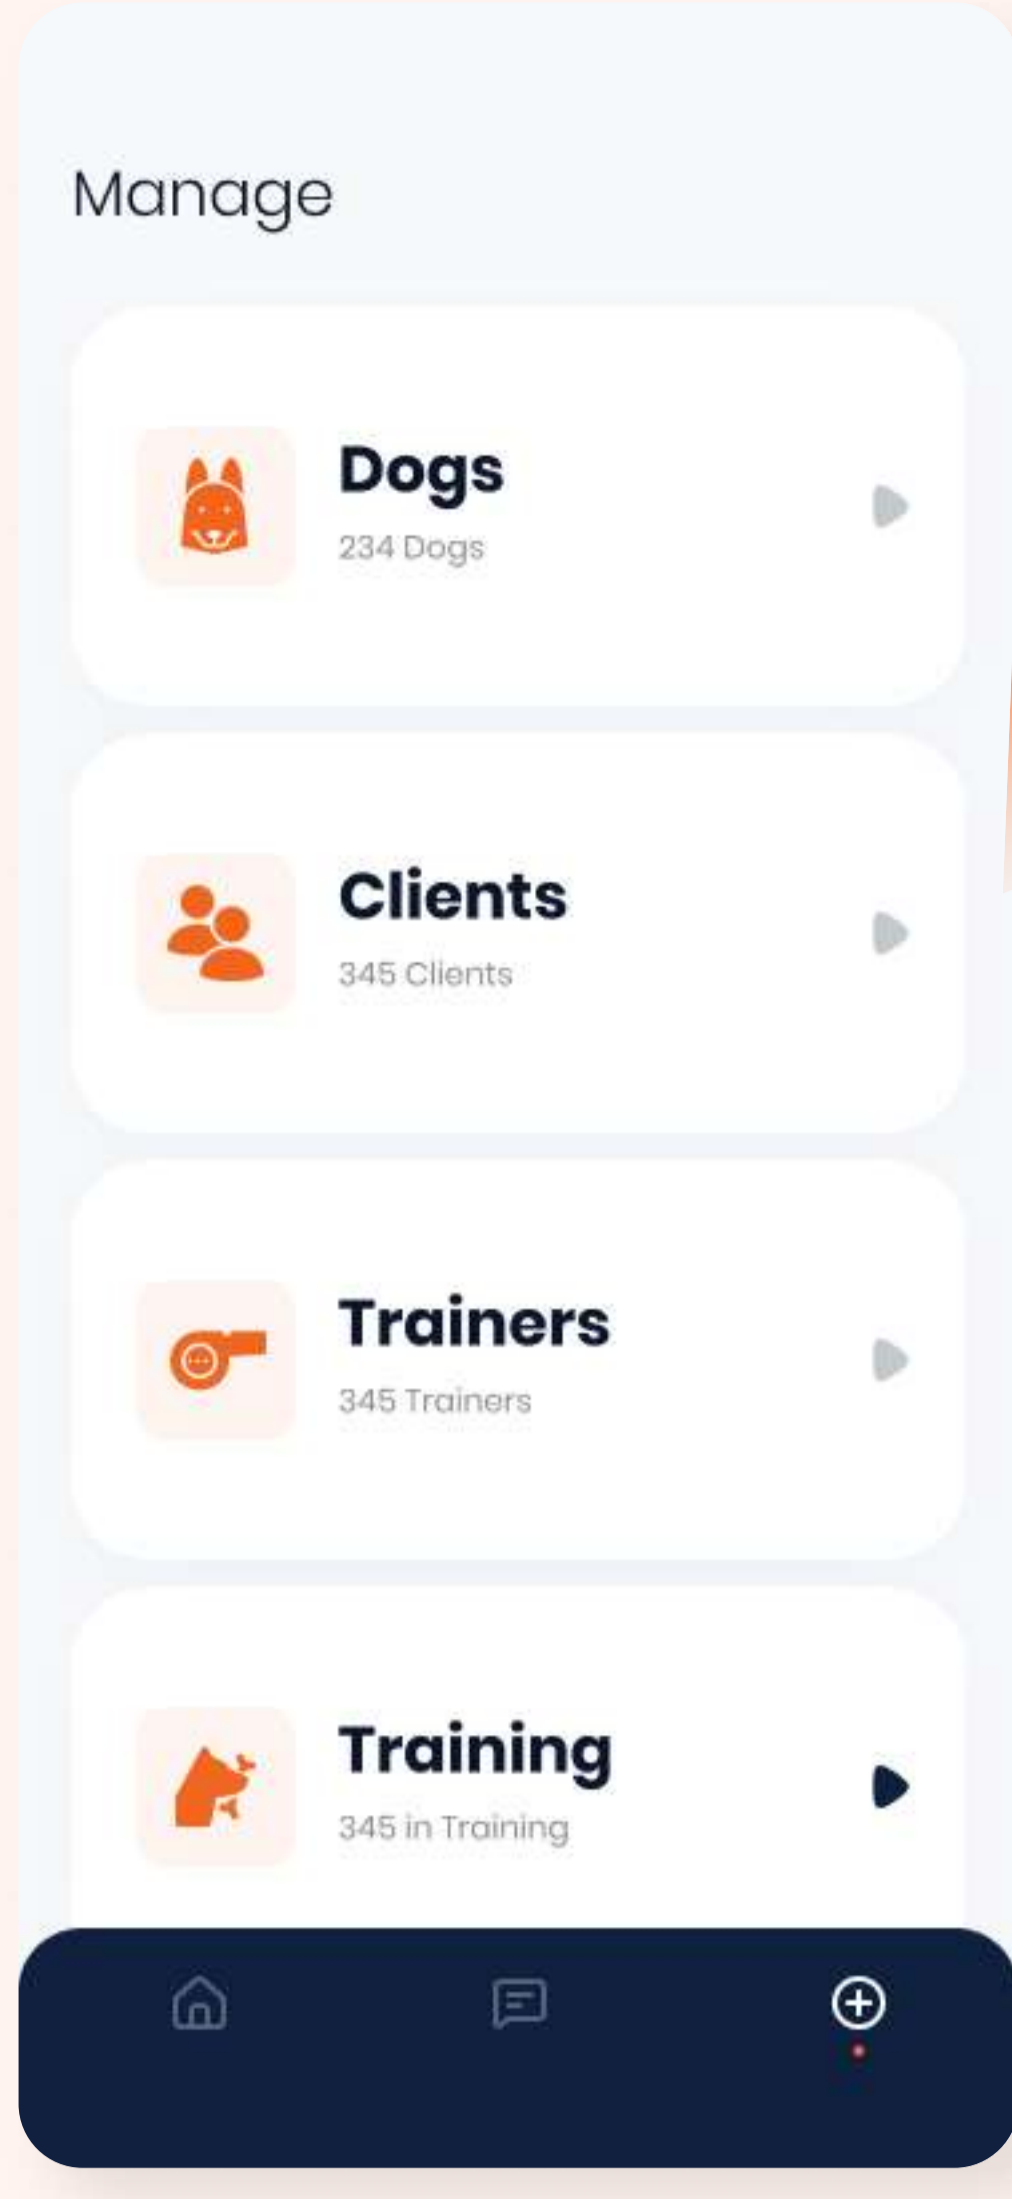

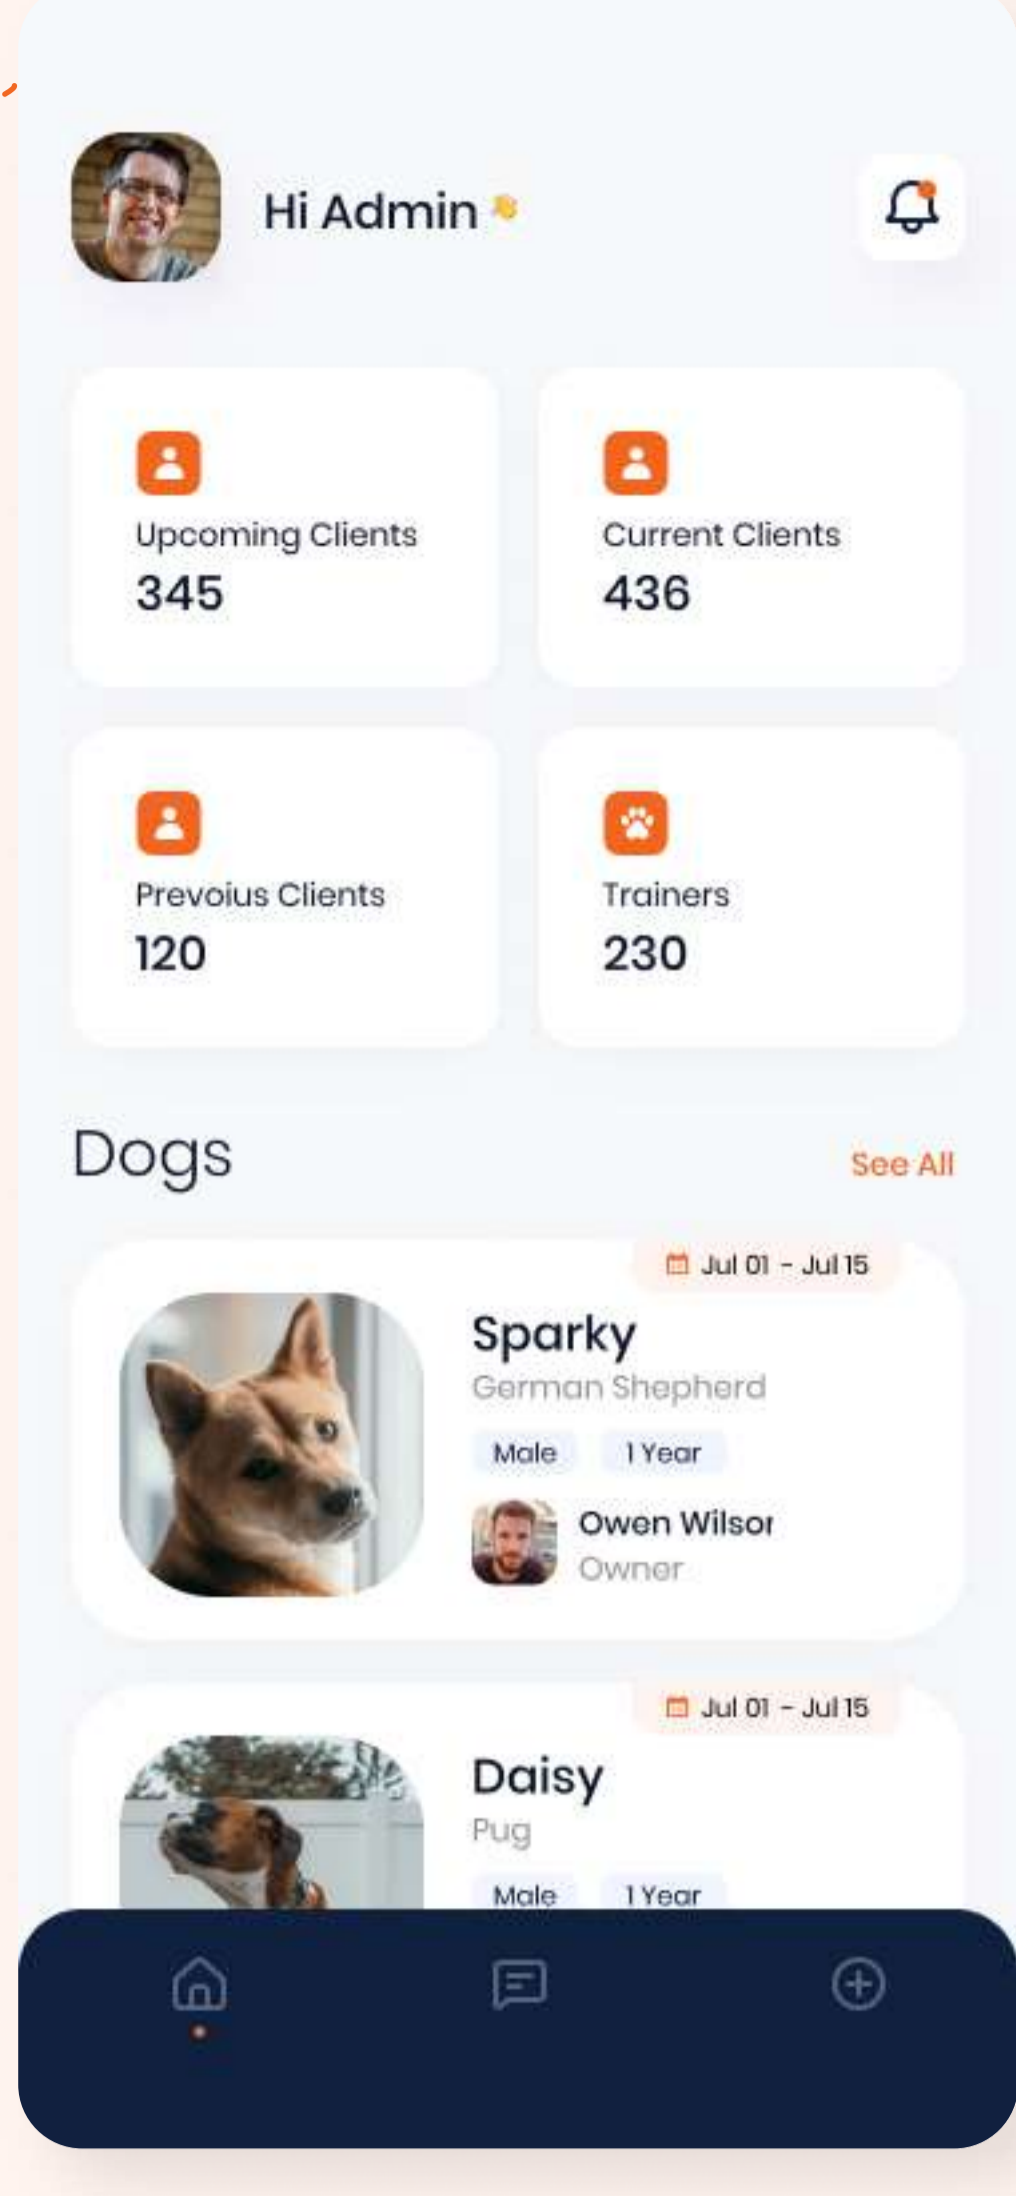

Customer

Client can login via the specified app provided for them in which they can find the best trainer for their pet, Manage pets profile, Able to connect to their pet's trainer with a call or chat to get updates of the pet or ask any doubts regarding pet training, get notified regarding the schedules and upload or view pet's images, Videos and other docs.

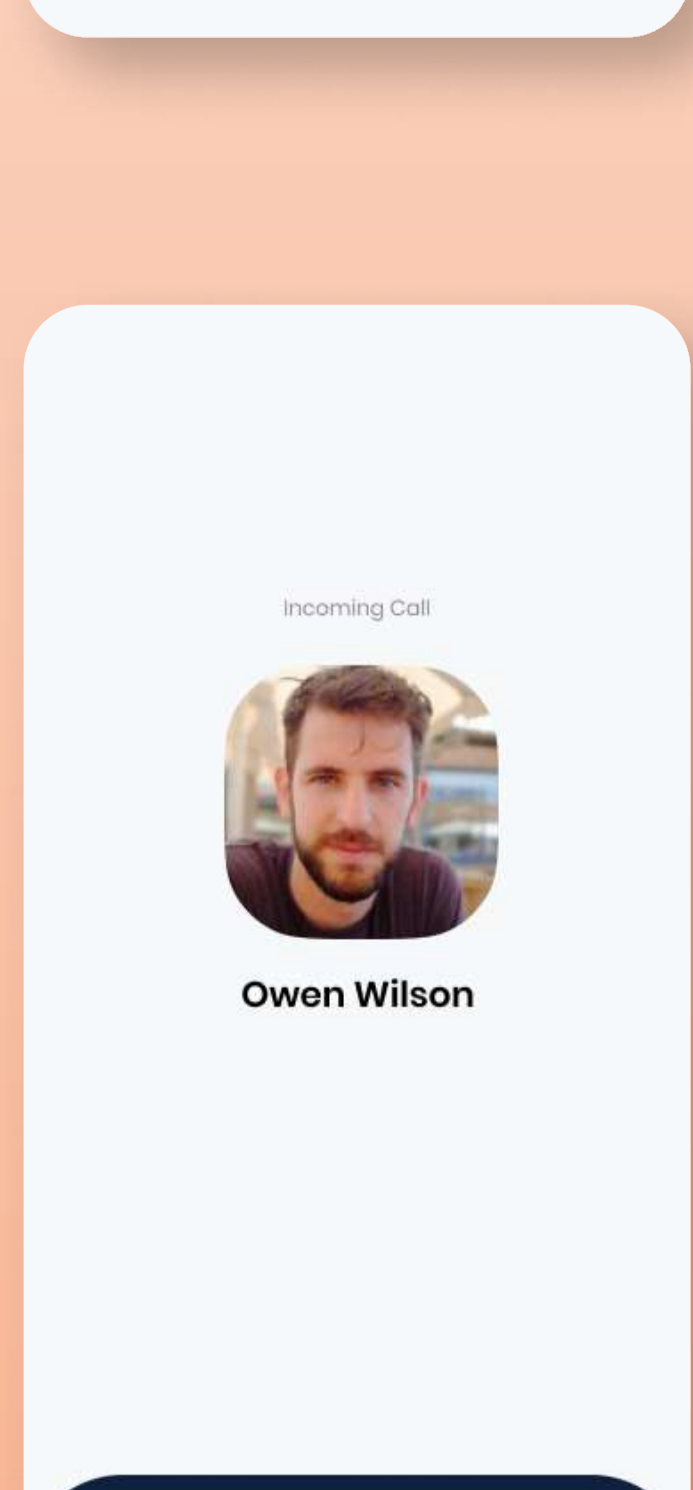

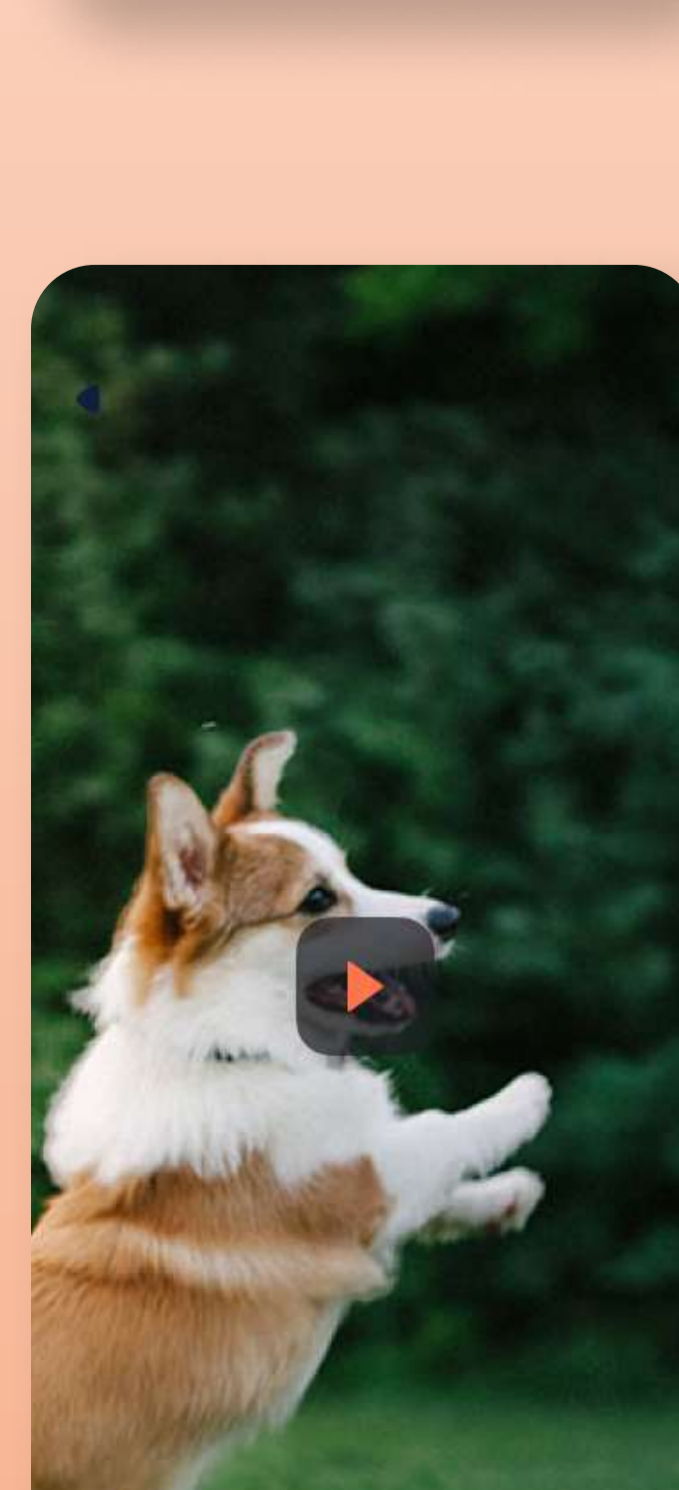

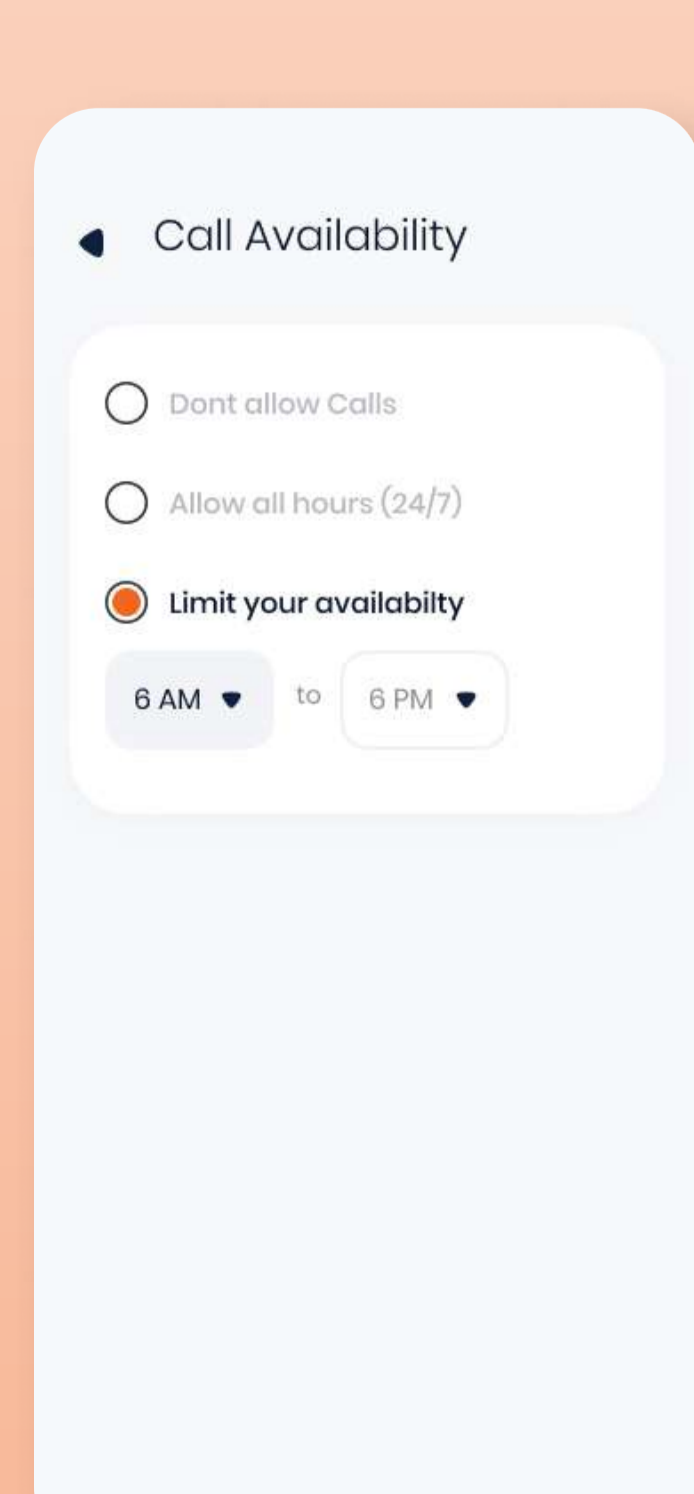

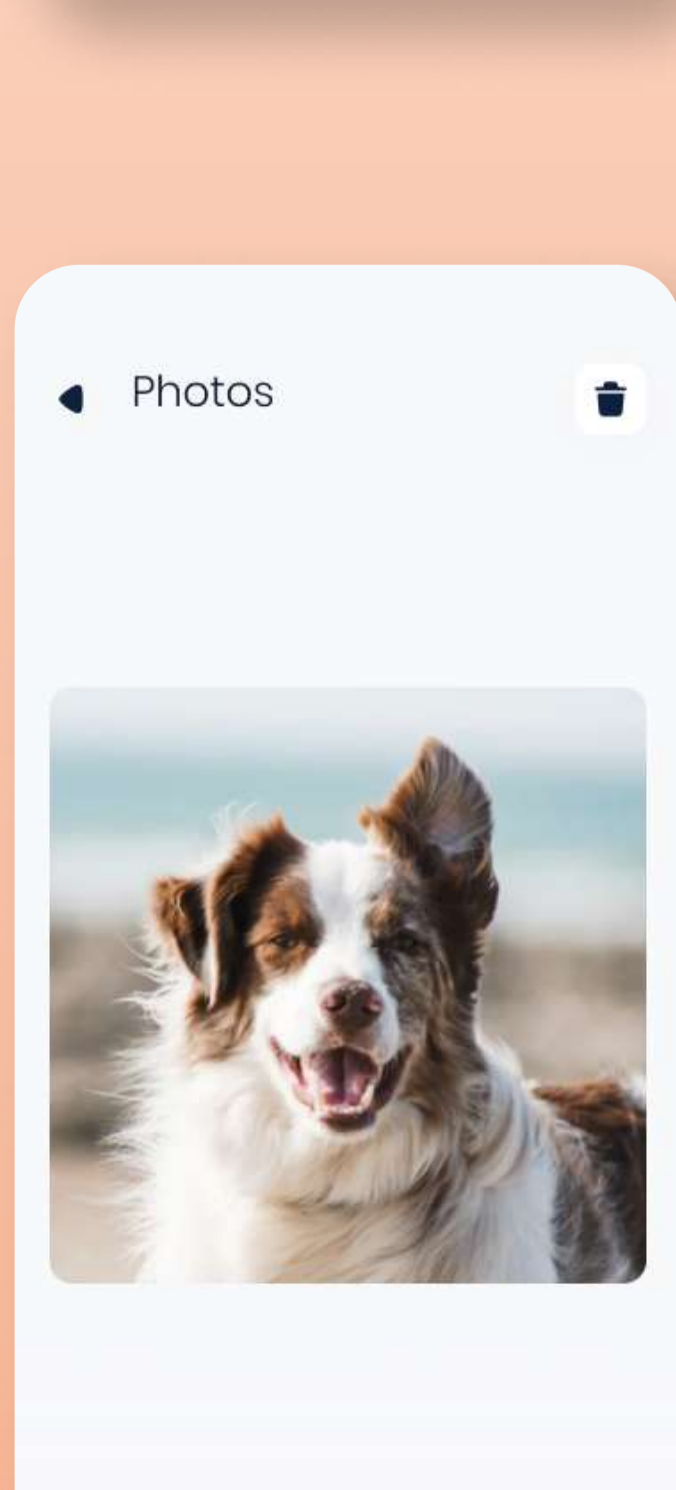

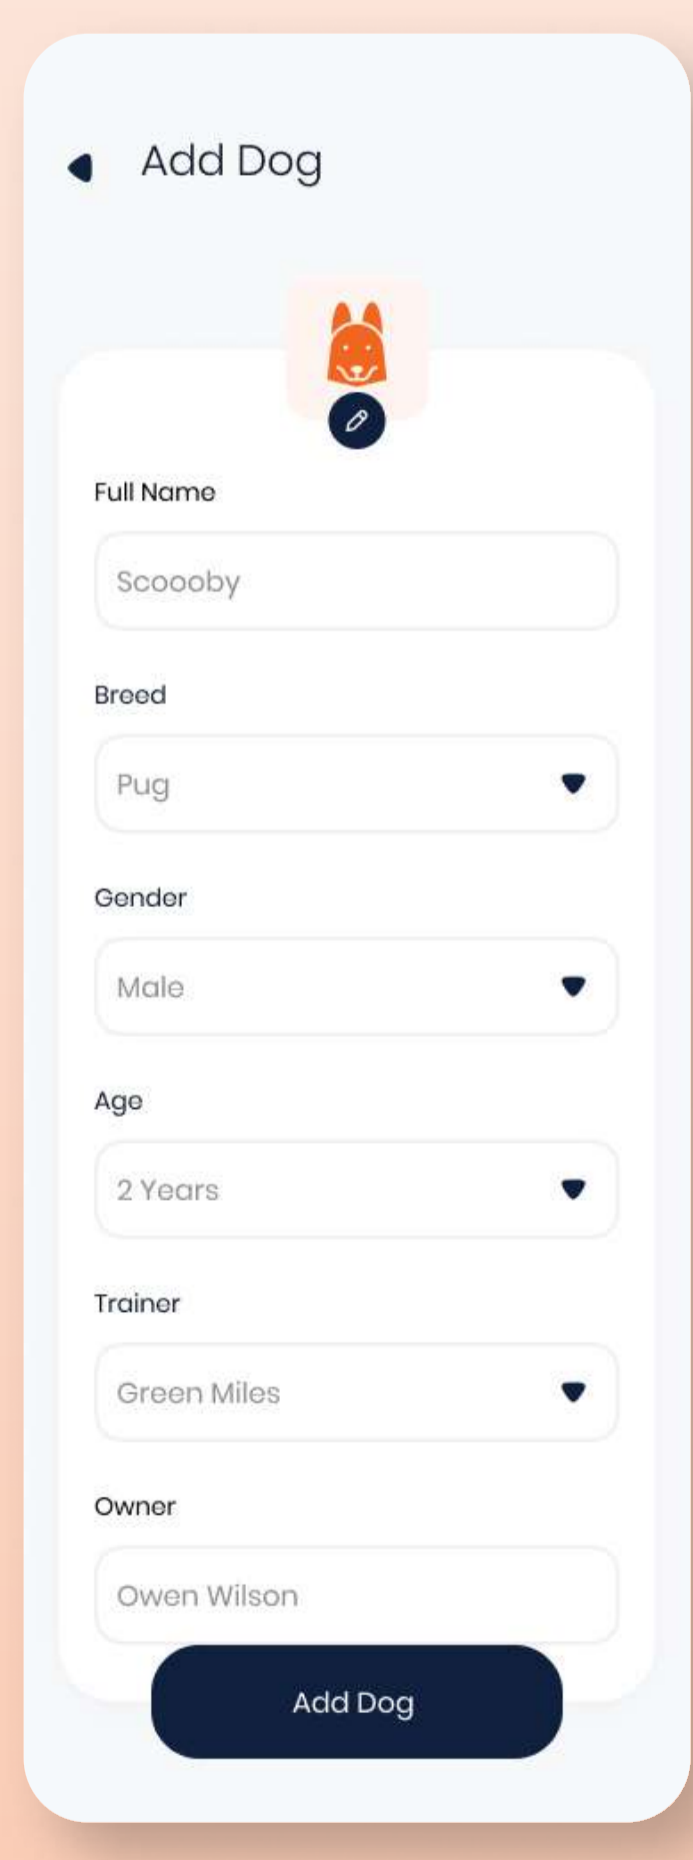

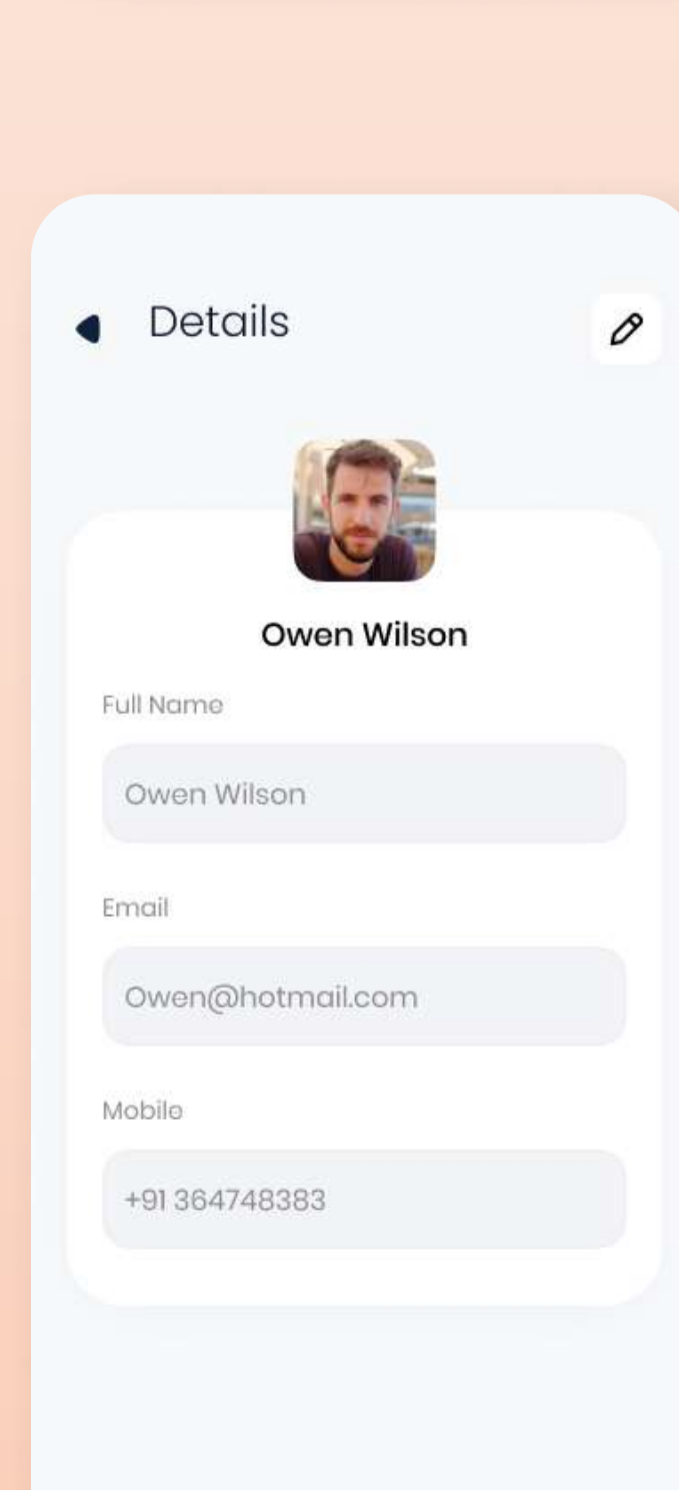

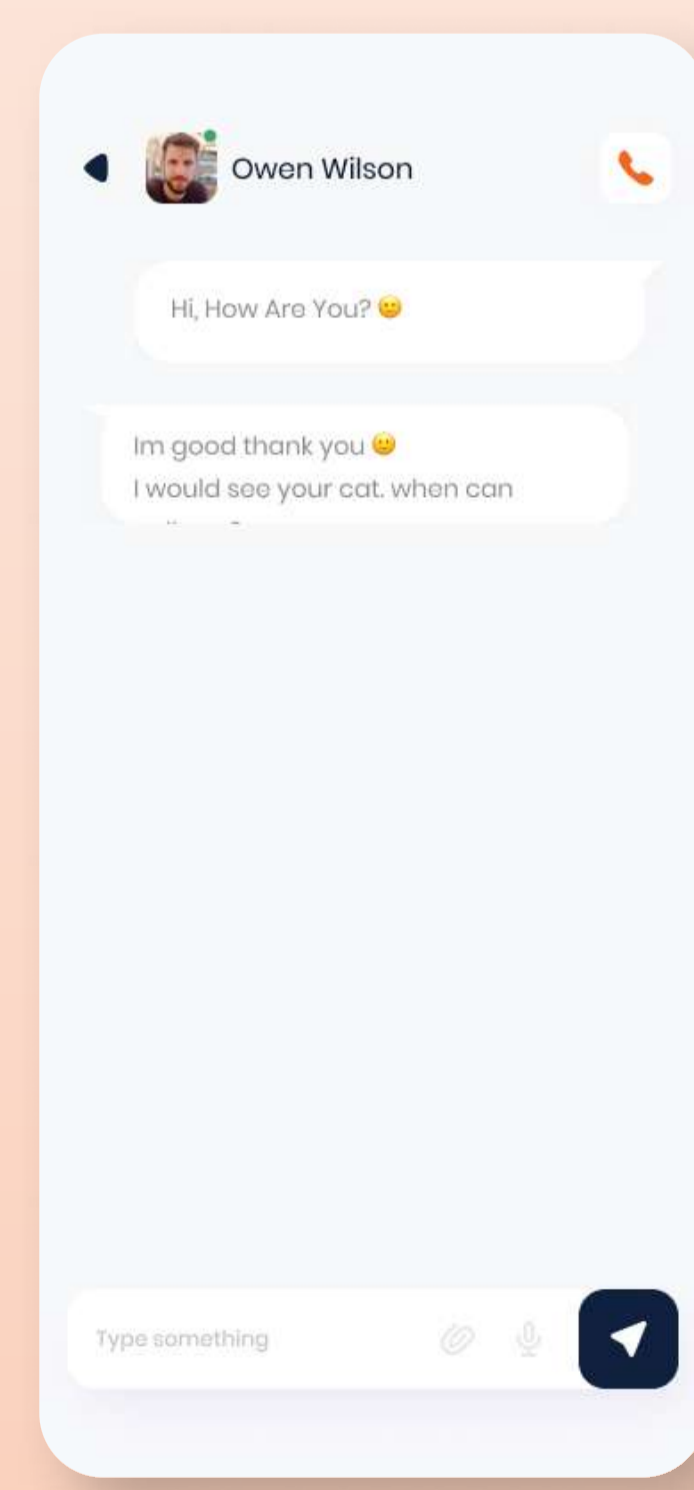

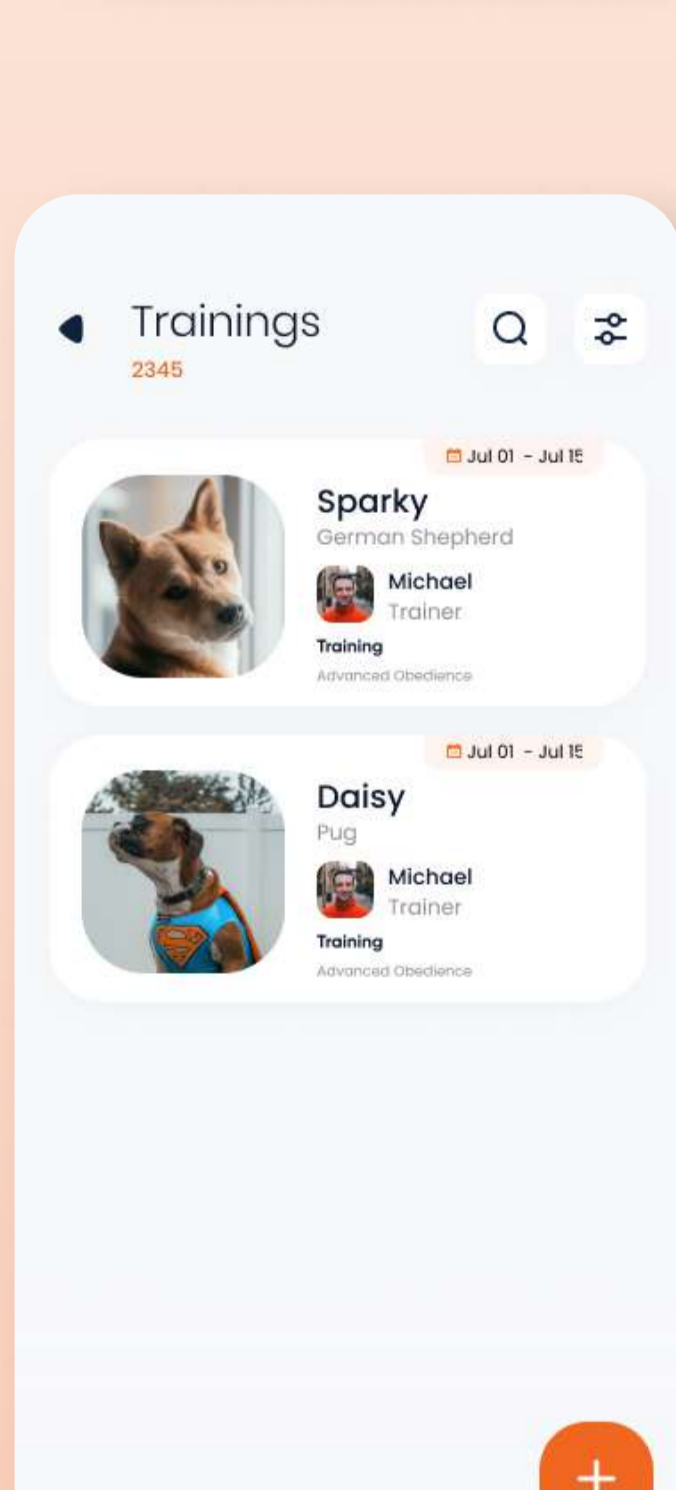

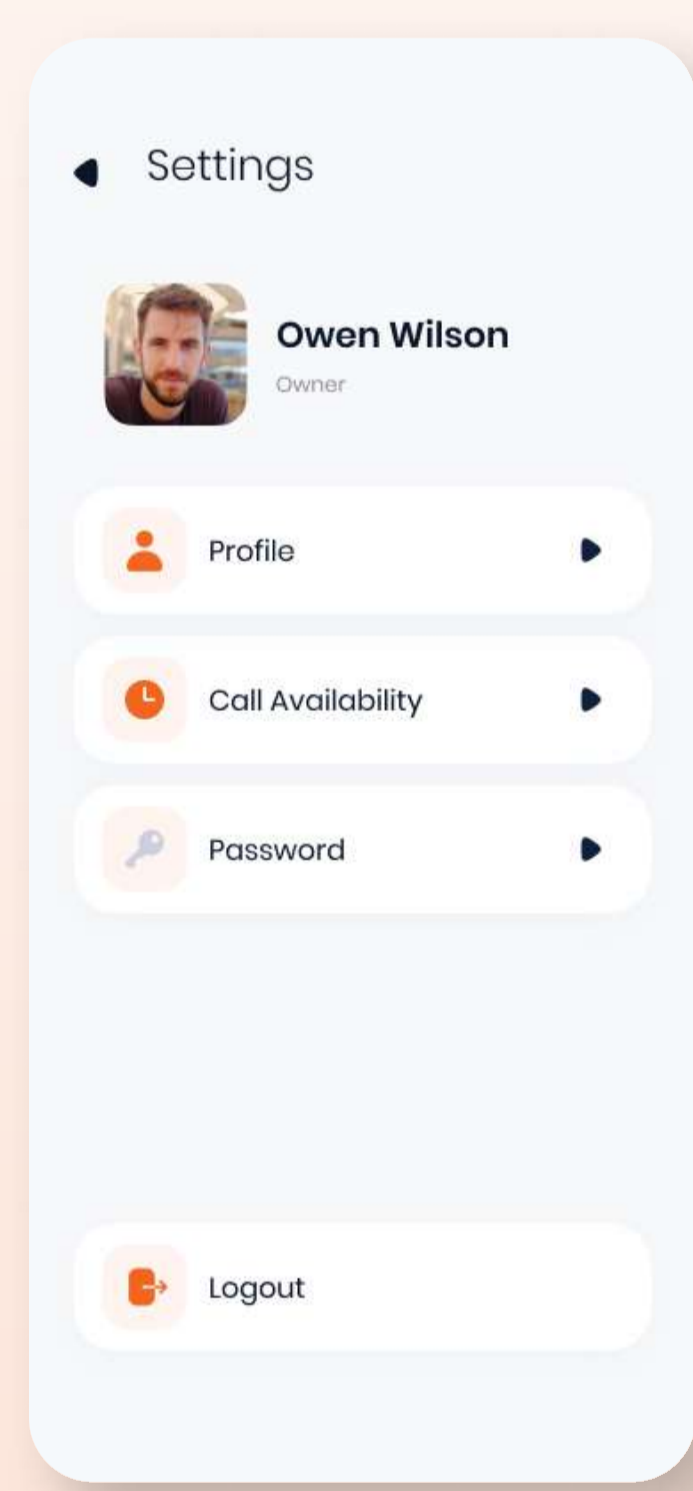

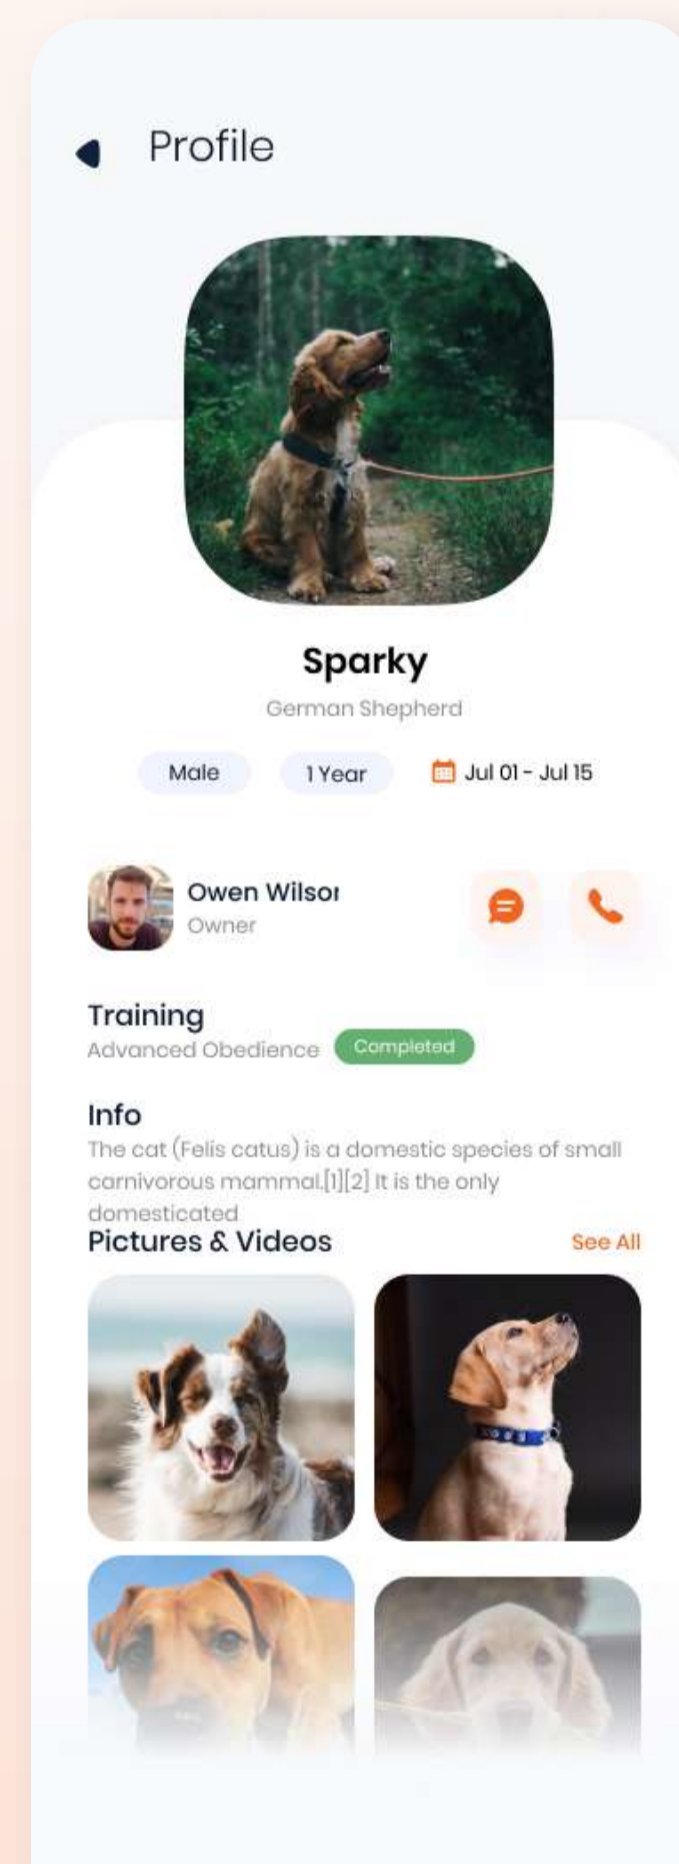

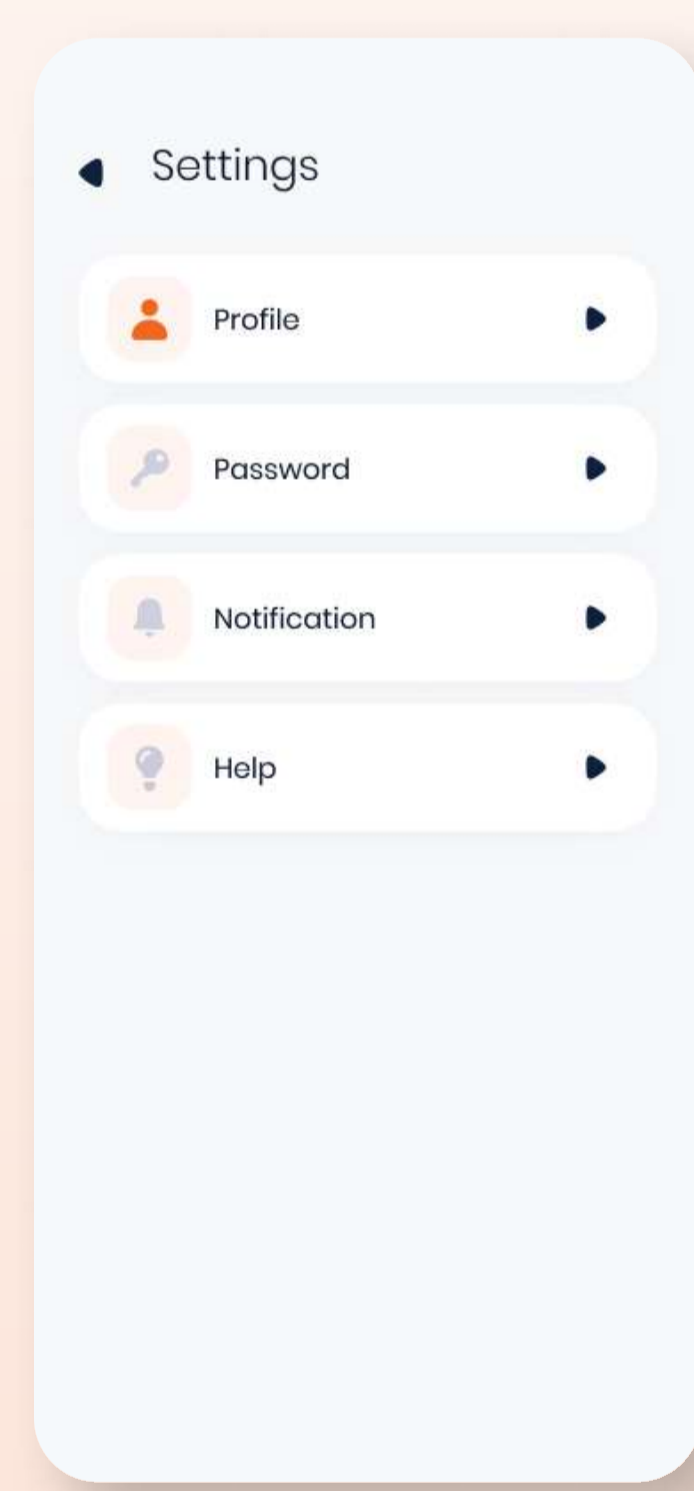

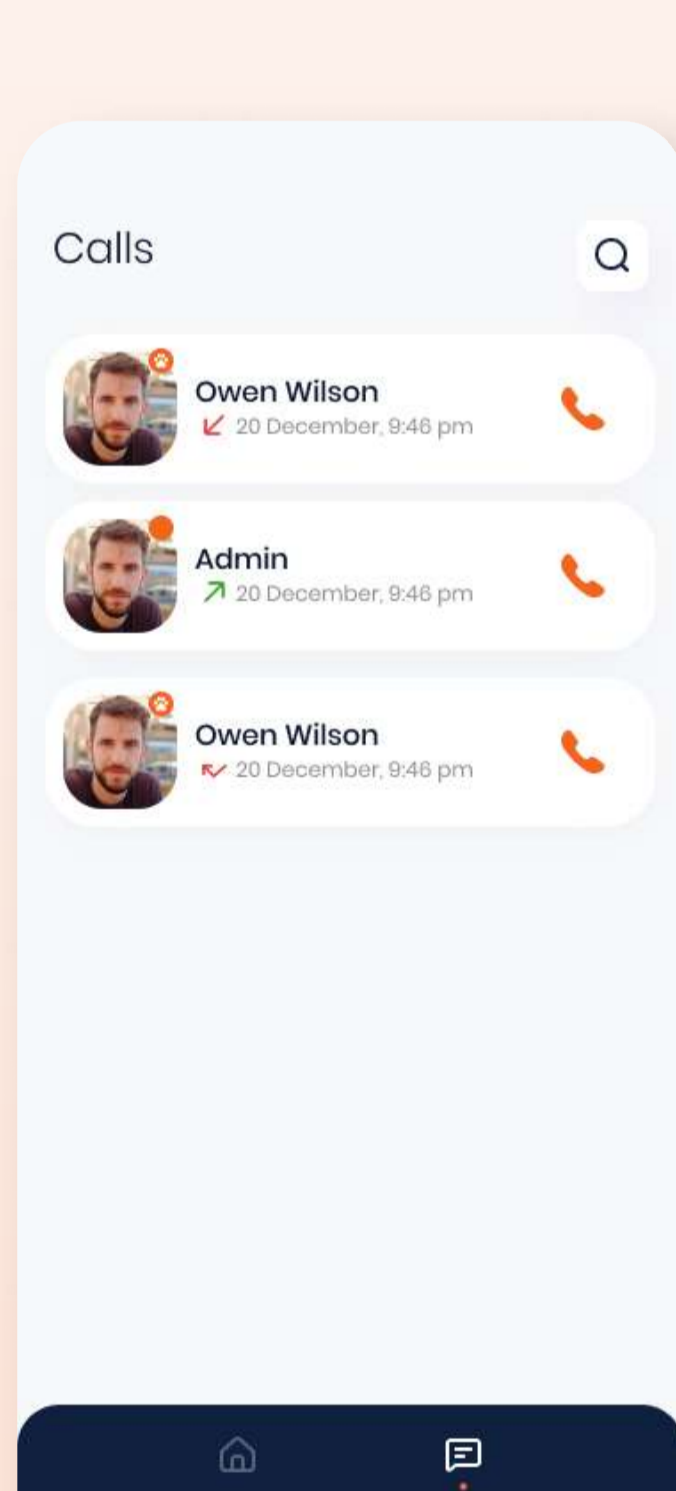

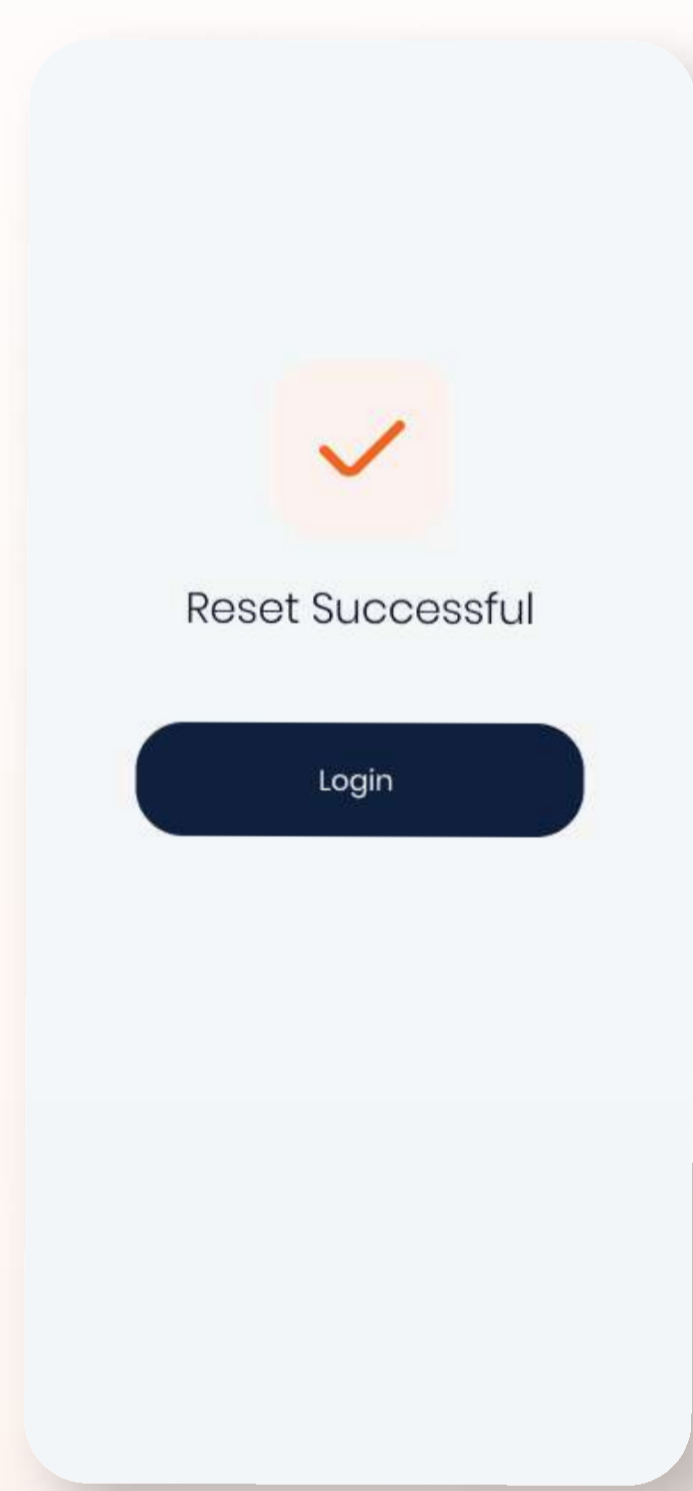

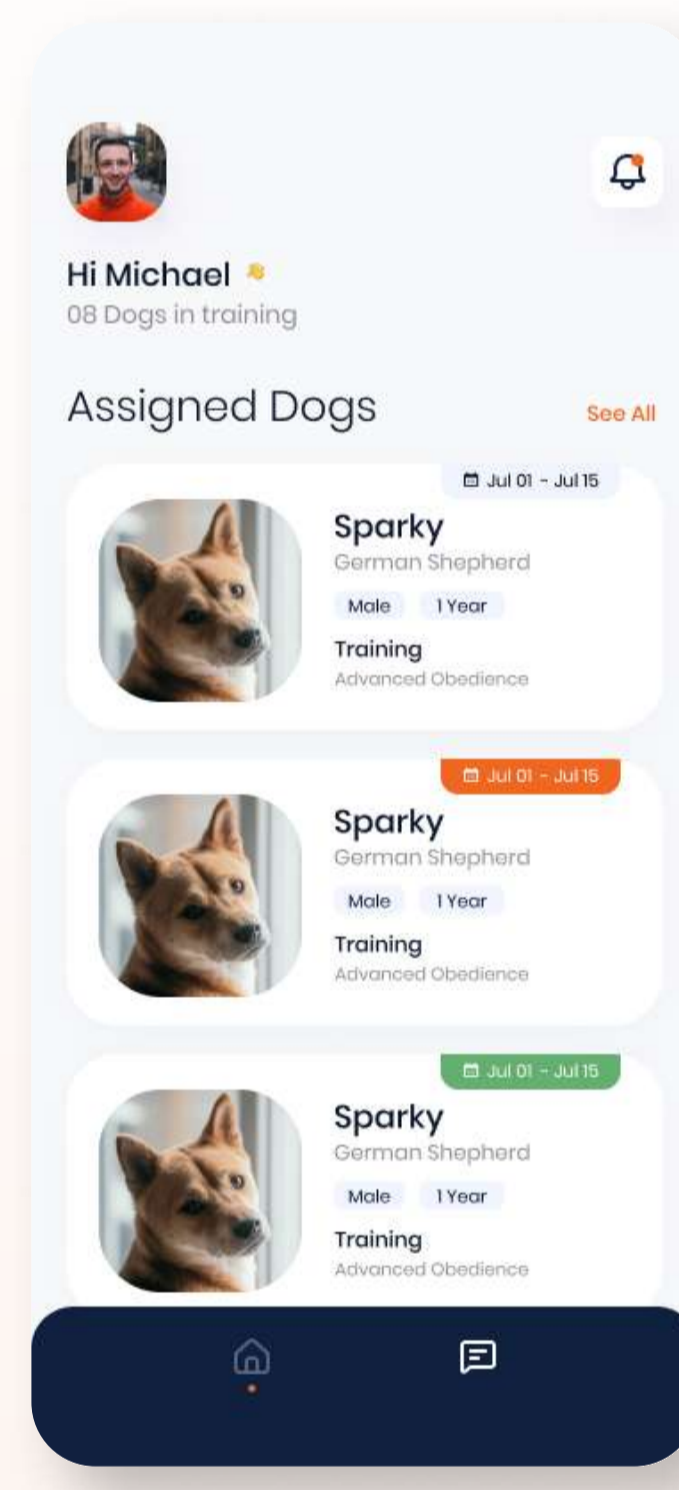

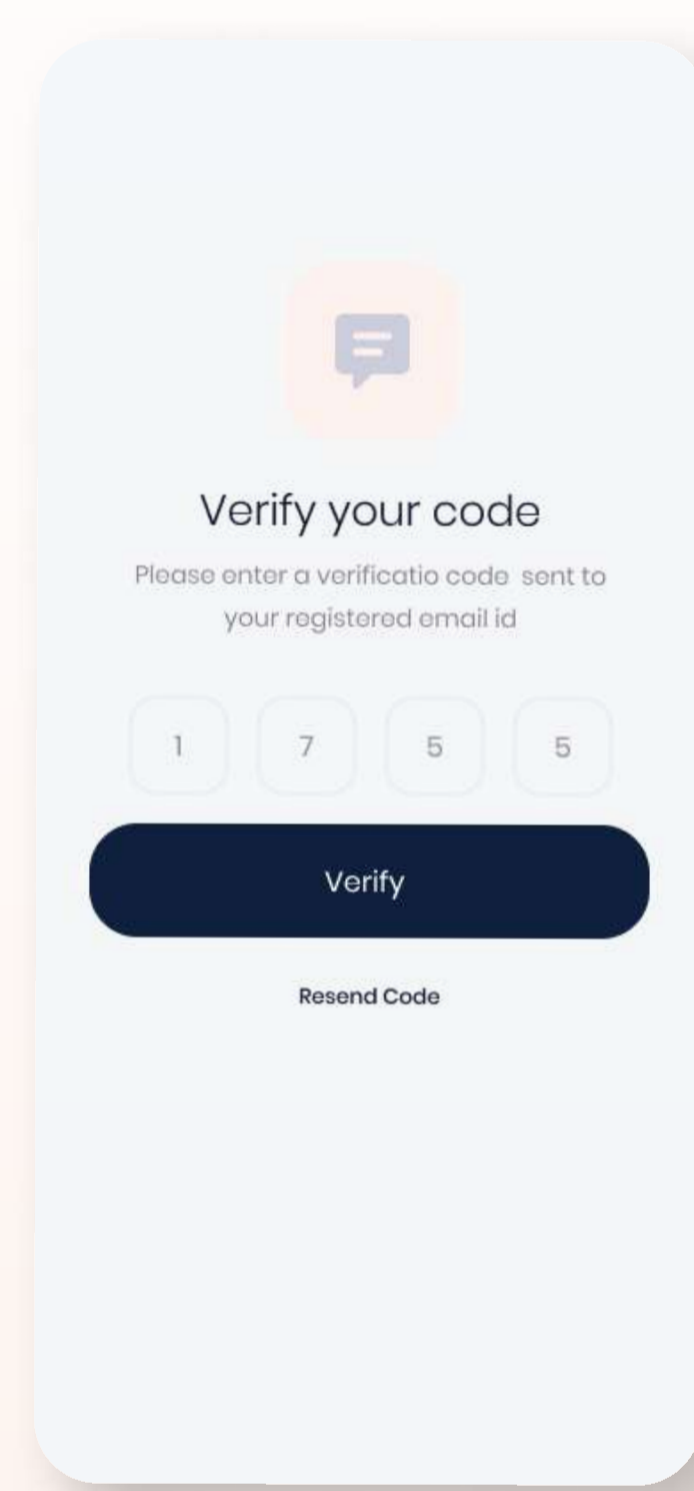

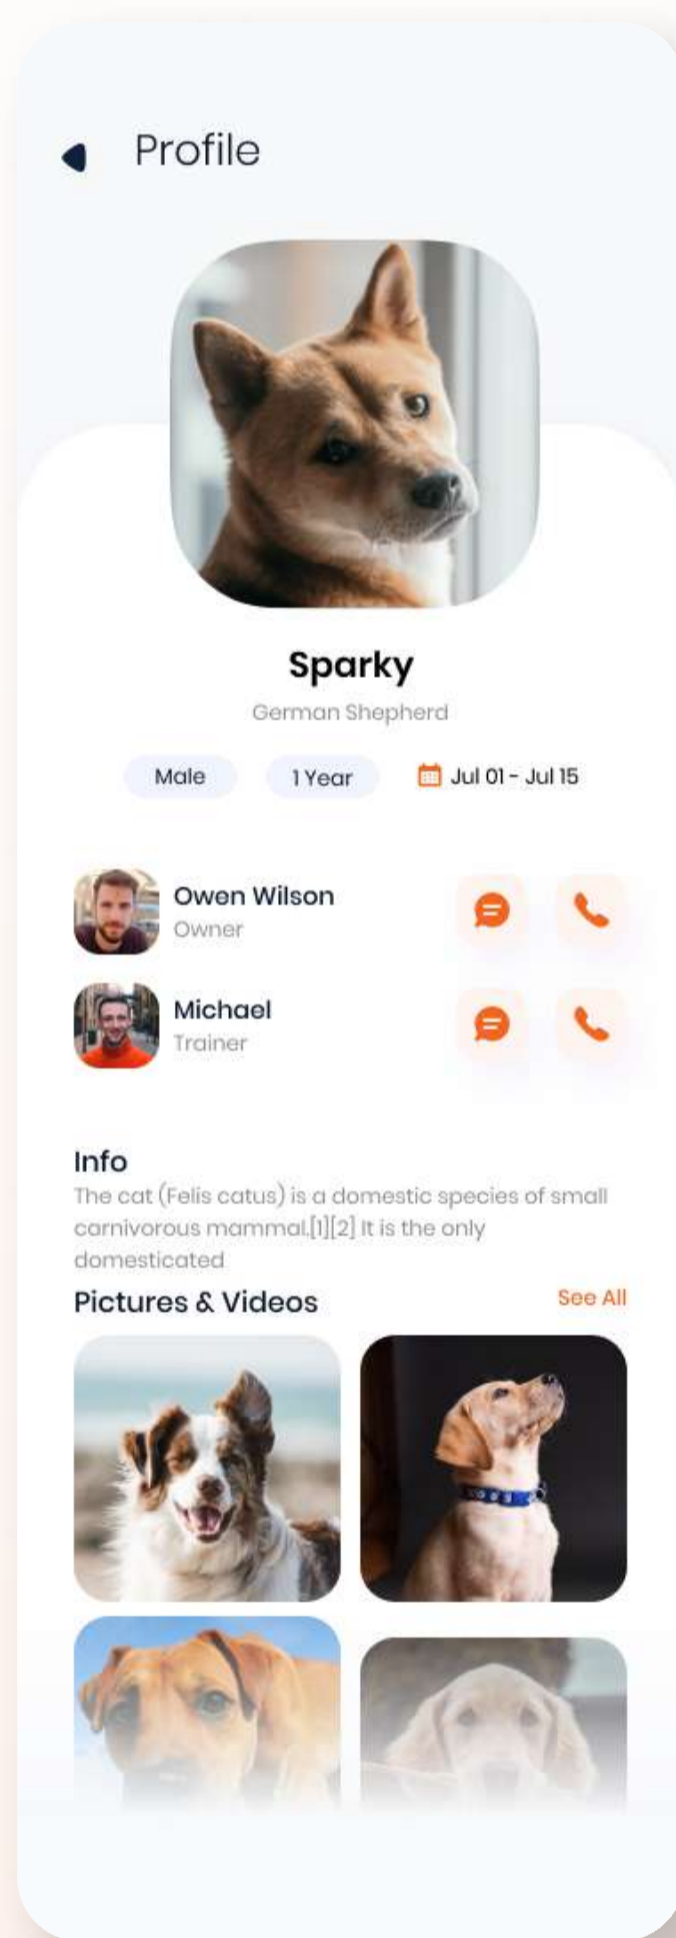

Admin

Admin can manage Upcoming clients, ongoing clients, Previous clients and pet Trainers, admin can monitor dogs, clients, trainers and dogs in training. Handle the profiles of the clients, trainers and dogs by creating new profile, edit the existing profile and delete admin can assign the trainers with the pet, Admin could connect with both pet trainers and owners via call or chat and upload or view pet's images, Videos and other docs.
